ASUS product Reviews

ASUS ZenBook UX305:The MacBook Air Killer We've Been Waiting For *– NDTV Gadgets*

"There's a lot to like about the Asus ZenBook UX305F. In fact, it's very nearly a power user's dream come true. It looks great and is extremely easy to carry around. There are clever elements of design throughout, but no extraneous fluff that seems to have come at the cost of features or usability. The screen, keyboard, trackpad and software are all attuned to the needs of a focused PC user. Battery life hasn't been compromised and neither has connectivity.And with all that praise, what really seals the deal for us is its price. At just a hair under Rs. 50,000, we have no hesitation whatsoever about recommending this laptop. If there was any doubt left about whether or not it's a legitimate MacBook Air killer, the price alone should put that to rest."

Asus EeeBook X205 review: Reincarnation of the netbook *– IBN Live*

While 33 cm(13) is the perfect size for a laptop screen in terms of function and portability, but the X205's 29.4 cm(11.6) also serves its purpose satisfactorily. This being a budget device, I didn't expect much from the display and the 1366x768 16:9 panel is along expected lines. Lightweight. Value for money. Attractive looks. Battery life.

Asus G551JK Laptop: Asus' emphatic challenge *– The Financial Express*

Like most laptops, this one doesn't get heated up at all. Its almost-silent cooling technology keeps the laptop surface metal cold even after long hours of gaming. The battery of the G551JK is a 6-cell one but I have never seen a 6-cell dole out that amount of long charge so its quite good.

ASUS ET2040INK AIO PC *– PC Quest*

The pocket and space friendly AIO packs a battery to keep you productive in case of emergency. It's always nice when manufacturers push above average processor and graphic components into pocket-friendly, energy -efficient machines. The ASUS E2040INK AIO is one of those machines featuring Intel J2900 processor coupled with HD graphics.

Asus Tytan G30 *– Gadget n more*

If you're looking for a gaming desktop the TYTAN G30 is certainly a good choice, especially if you're the type of gamer that doesn't want to build a rig on his own. Overall ASUS did a good job and especially pricing with the most powerful TYTAN G30 is competitive. These are really fast desktops and if you're the type of user that prefers to buy a pre-built system, then the TYTAN G30's will be a good choice.

Asus Fonepad 7 FE170CG (2014) *– TechnoFall*

The Asus Fonepad 7 FE170CG which was launched in 2014 as a upgrade to the previous model, is a perfect fit for low cost tablets. At this price range, this tablet is just perfect and I recommend it to you. You will face no problem in multitasking and playing normal games. Games like Asphalt 8 and dead trigger were running smoothly at low graphics.

ATTENTION Specifications are subject to change at any time without notice. Please contact the store / dealer nearby for more information. PCB color and bundled version software can change at any time without notice. Battery life depends on the specific configuration tools, usage and environmental conditions. Numbers listed on every feature depending on the specific conditions and usage.

Marks in History, ASUS Notebooks

ASUS notebooks have proven themselves in harshest conditions and locations, becoming a legend. ASUS's search for incredible have empowered courageous and adventurous people everywhere. Let's take a look at the several feats that have left an incredible mark on computing history.

In outer space
Zero defects during 600 days in orbit!

Two ASUS notebooks were selected by R&K, a major computers and electronics supplier to the aerospace industry, to provide astronauts with dependable computing hardware.

"ASUS notebooks never overheated", said Sergei Avdeev, one of the Russion cosmonauts. "Only notebooks with the best cooling can survive continuous operation in space, and our ASUS notebooks worked problem-free."

In the air
Helping the NRMA CareFlight Helicopter rescue unit save lives!

NRMA CareFlight uses ASUS notebooks in different fields, including aviation, medical treatment, and administration. ASUS notebooks play a critical role in improving survival rates in severe head trauma incidents. They help medical teams arrive on-sit faster than ambulances, with fatalities lowered by 33%. "Our pilots are very impressed with ASUS notebooks and amazed at their durability," said Mark Lees, Community Relations Manager of CareFlight.

At the ends of the earth
Conquering Antarctica

December 2003 expedition with acclaimned mountaineers Shi Wang and Jian Liu set out to reach the summit of Mount Vinson, the tallest peak in Antarctica at 16,000 feet, where temperatures drop below -100°F. Wang and Liu brought ASUS S200N notebooks, which met their need perfectly, being light and compact and designed to handle the rigors of exploration. "It was great having notebooks we could count on in situations where malfunctions are unacceptable," said Shi Wang

On the world's highest peak
First notebooks to scale Mount Everest

Conditions at the world's tallest mountain may faze other notebooks, but ASUS U5/S6, W7, and U1 notebooks were chosen to accompany an expedition to the top at Mount Everest. The U5 even made it to the peak at a height of 8848m, with expedition leader Captain Wang YongFong carrying it as a tribute to eco-friendly technology and making ASUS the world's first notebooks at the top of Mount Everest.
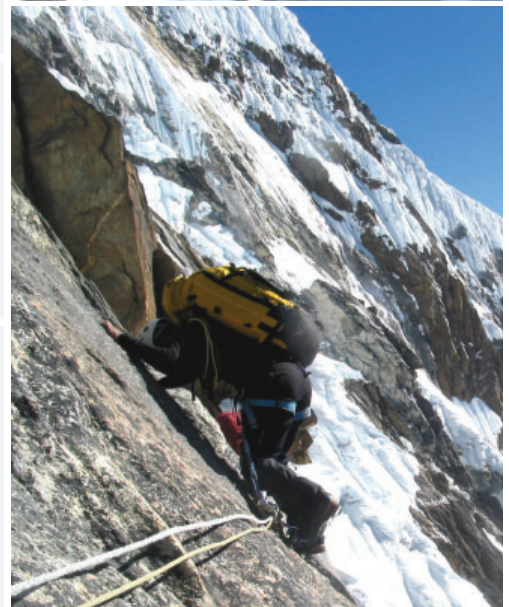

Braving the desert
Survival of the fittest at Lop Nor

The ASUS search for incredible goes on, with the ASUS team taking ASUS Zenbook to Xinjiang's Lop Nor dry lake in China, which has a reputation for being one of the most challenging parts of the world. Located in the Kumtag desert, the region has extreme temperature changes with high heat during the day and freezing cold at night, a nearly complete absence of moisture, and dangerous wind gusts. This barren and has been used in the past for nuclear weapons testing, and today few people live there. ASUS notebooks made it through the trek, helping capture incredible experiences and moments.

Intel, the Intel logo, the Intel Inside logo, Intel® Core™ and Core Inside are trademarks of Intel Corporation in the U.S. and/or other countries.

ASUS Product Guide | July - Aug 2015   13

Extreme Testing for The Best Notebook Quality

All ASUS notebooks have been through a series of testing process to ensure each model was resilient and reliable. ASUS notebooks have been through a lot of testing under extreme conditions and situations (not that commonly happens in everyday life). This is done to ensure ASUS Notebooks can always give a good performance in any condition.

Keyboard Test

Express yourself confidently ! Thanks to the keyboard durability tests, where special robots punch each key to check its feedback and lastability even in the face of some brutal input that may happen, ASUS keyboard would perform at its best.

Abrasive Test

Abrasive resistance test subjects ASUS notebook exteriors to friction, indicating colours and surface materials stay at prime condition even after extensive and demanding usage.

Noise Test

Abrasive noice tests check for loud fans, storage, even power delivery buzz, hushing them to create quiet notebooks. The entire chassis then passes audio tunning to deliver the best sound possible.

Pressure Test

Premium panels must handle limited spaces such as suitcases, and allow you to touch them without causing damage or distortion, so panel pressure testing ensures ASUS notebooks only use the best.

Enhanced Hinge Test

Notebook lid hinges are weak spots. If cheap materials are used they'll snap. Vigorous hinge testing conducts thousands of open/close cycles, making sure hinges last the life of your notebook.

asus.com/in

Vibration Test

Riding on bumpy roads, some PCs may start falling apart. Not ASUS notebooks. Harsh vibration testing ensures that the parts stay together and performance remains consistent even during shakes!

Shock Test

Shock test takes notebooks and simulates incidents that occur during shipping. With a big smile on their face, engineers make sure the notebooks survive these with no performance penalty.

Twist Test

Twist test checks chassis rigidity. Grabbing the notebook with one hand? No problem, this trial checks for uneven twist force endurance to give you the flexibility you need

Acceleration Test

Halt test stands for Highly Accelerated Life Test, and express moves of notebooks through their typical life cycle to ferret out problems, with extensive analysis conducted by engineers.

Port Test

Port test ascertains contacts and plugs are solid for frequent plugging / unplugging and can handle cable quality variations without data transfer and fidelity degradation.

Temperature Test

Tough temperature tests varity of diverse operating conditions, from every low temperatures to high heat, including humidity for accurate results. Whatever the mercury shows, ASUS notebooks can take it.
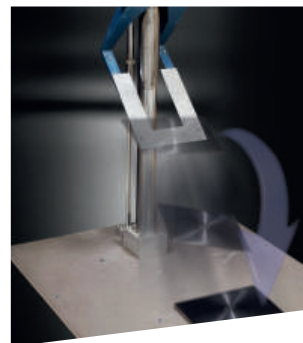

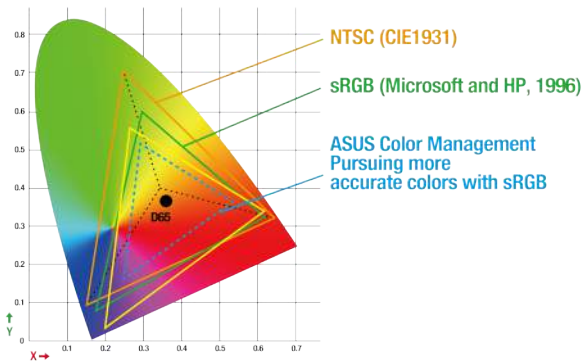

Drop Test

Drop test proves notebook free fall resistance. ASUS quality means notebooks handle drops with no damage to internal components or external design, far beyond industry standards.

5 Reasons to Love ASUS

ASUS has a commitment to provide good features to users ASUS's commitment to provide the best satisfaction focuses on five things: design, sound, intuitive touch both in terms of software and hardware, the speed of response with Instant On 2 seconds Feature and the Cloud Storage for additional storage needs.

asus DESIGN	⫴	👆	Instant on	Cloud Storage
Authentic Beauty	**Incredible Sound**	**Intuitive Touch**	**Quick Response**	**Ubiquitous Access**

1. Authentic Beauty

NTSC (CIE1931)

sRGB (Microsoft and HP, 1996)

ASUS Color Management Pursuing more accurate colors with sRGB

ASUS Splendid Technology

With ASUS Splendid technology combined with panel technology and sophisticated software, you can get the display colours life like and accurate for stunning visuals on any content. This technology provides more accurate colour and adds life to the latest panel technology. Combined with sophisticated software, ASUS Splendid technology, can easily set the display colours alive and more accurate.

2. Incredible Sound

SonicMaster Audio Technology

The combination and the perfect mix of beauty with design, advanced devices, and rich software delivers, stunning audio quality. With the support of this SonicMaster technology, the sound gets louder, detailed, and accurate. Moreover, with the Audio Wizard software support one enjoys features that comes with five audio mode options to adapt any need.

Transparent & Clear Voice

Clear sound in all directions

Loud & deep bass

Illuminated Gaming Keyboard	*Audio Wizard* ROG Gaming Audio Wizard	SonicMaster Audio	

Unbeatable Gaming Laptop with TurboMaster Overclocking

G751 is an unbeatable gaming laptop, thanks to its 4th-gen Intel® Core™ i7 processor and NVIDIA® GeForce® GTX graphics, with TurboMaster technology for stable GPU overclocking and ROG AudioWizard-enhanced audio for immersive gaming. Its intelligent dual-fan cooling system keeps everything cool even in the heat of battles, and special keys let you access Steam or share memorable gaming moments with the world! With its aluminum finish and illuminated ROG logo, there's no doubting on the ROG G751's gaming DNA. You'll be immersed in a Full HD gaming world through a 178-degree wide-view angled display with an anti-glare coat; while an ergonomically-angled keyboard ensures no fatigue during marathon gaming sessions.

Enthusiast-grade NVIDIA® GTX series Graphics

The latest enthusiast-grade NVIDIA® GTX series graphics scores over 12.000+ in the 3DMark 11 performance benchmark, providing you with sharper visuals for fast-paced games. NVIDIA® GeForce® Experience™ optimizes settings for higher resolutions and greater in-game detail for extra-sharp image quality; it also enhances frame rates to give you super smooth gameplay.

No.1 In ASIA PACIFIC*

* IDC 2014, Excluding China & Japan

Bang & Olufsen Speaker	Ultra Thin & Light design	**INSTANT ON** Instant On 2 Sec	**FULL HD** Screen FHD 1920 x 1080	Quick Charge Gadget	**IPS Display** IPS screen technology	**USB 3.0** Fast data transfer	Audio SonicMaster

Your Slim, Featherweight Powerhouse

ZenBook UX305 weighs a mere 1.2kg, and is just 1.2cm thin. It is quite simply the thinnest and lightest laptop with a 33.7cm (13.3) display. The light, agile ZenBook UX305 epitomizes elegance with its two chic finishes. Obsidian Stone with its spun-metal hairline details, and subtle diamond-cut edges further highlight its understated beauty. ZenBook UX305's balanced design is more than simply beautiful but also a performance stunner. With 4GB of fast memory, lightning-speed solid-state drive and a powerful Intel® Core™ M processor, you're never left waiting. ZenBook UX305's 512GB solid-state drive runs nearly six times faster than conventional hard drives. Apps open in moments and files in a flash.

Extra-long Battery Life up to 10 Hours

ZenBook UX305's powerful battery and intelligent power management keeps it working for up to ten hours. So when your long workday is done and it's time to unwind, there's plenty of power left for play in your zenbook. ZenBook UX305's balanced design is more than simply beautiful but it's a performance stunner. With 4GB of fast memory, lightning-speed solid-state drive and a powerful Intel® Core™ M processor.you will never have to wait.

GOOD DESIGN AWARD 2014
BEST 100

Finer Display for Finer Details

Your exsistence comes to life on ZenBook UX305's Quad Full HD Anti Glare touchscreen. 178-degree viewing angle and anti-glare coating render images with far more depth. The advanced ASUS technology delivers full-bodied, accurate colors in an extra-wide color gamut (72% NTSC) for truly stunning, vivid visual delights.

More Power-packed Than Ever

With up to 4GB memory, ultra-fast 512GB SSD storage, high-speed 802.11ac Wi-Fi connectivity and three USB 3.0 ports, ZenBook UX305 is turbocharged for all your computing needs. And with its super-quiet, fanless design your enjoyment is never disturbed.. ZenBook UX305's 512GB solid-state drive runs nearly six times faster than conventional hard drives.

Fast Connectivity Redefined

In ZenBook UX305 there are three USB 3.0 ports, which transfers data up to ten times (10X) faster than the older USB 2.0 connections, and helps to deliver more power for faster charging. ZenBook UX305 goes still further, with ASUS USB Charger+ technology built in to one port to charge connected devices up to 50% faster — even when ZenBook is asleep or switched off!

Splendid Splendid Technology	**INSTANT ON** 2 seconds Instant On	40%** Bigger Touch Pad	Stay Cool with IceCool Technology	3x Longer Battery Life Cycle	**USB 3.0** Fast data transfer	SonicMaster Audio

Amazing Audio Quality

A mixture of hardware, software, and tuning, SonicMaster was developed with the clear goal of giving you the best notebook PC audio. A professional codec ensures precise sound performance, an optimized amplifier gives you louder volumes, while larger speakers and resonance chambers deliver powerful audio output and deeper bass. Additional signal processing helps fine tune the hardware, filtering noise and improving audio clarity so that you can enjoy unrivalled audio on your X553 & X555 Series.

Precise Input and Comfort with ASUS IceCool Technology

ASUS X series notebook features the ergonomic seamless one-piece keyboard & is designed to provide you the most comfortable typing experience. ASUS IceCool technology keeps the palm rest at a temperature range between 28°C to 35°C, This is significantly lower than our body temperature, making typing a little more comfortable for you.
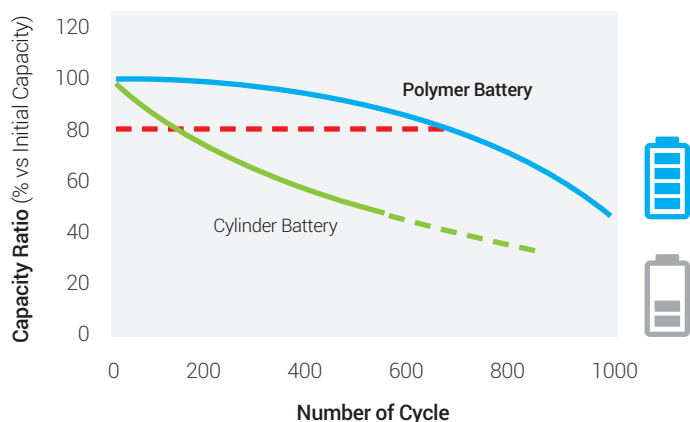

Long Lifespan Li-Polymer Battery

ASUS Xseries notebooks have a Li-Polymer battery that gives you up to 3x more battery life than the lifespan of Li-ion cylinder batteries. Even after hundreds of charge cycles, it still holds up to 80% of its original charge capacity.The ASUS Xseries features a 2-second instant resume, so you can go from sleep mode to surfing the net or working on documents in a jiffy.

Chart: Capacity Ratio (% vs Initial Capacity) vs Number of Cycle. Polymer Battery, Cylinder Battery.

ASUS Splendid Technology

Developed by the ASUS Golden Eye team, the exclusive ASUS Splendid technology gives you accurate colours and colour temperature. It delivers brilliant & vibrant colour by fine-tuning various display settings and parameters. ASUS Splendid technology gives you four different video settings to ensure the best visual possible.

Normal Mode

Configures colour gamut aspects for picture optimisation, suitable for reading documents or for daily activities.

Theater Mode

Skin colour will look more natural when watching videos.

Vivid Mode

Enhances the contrast level and colour saturation for life like pictures. Suitable for viewing colour-rich photos.

Manual Mode

For professionals to manually configures the colour settings.

- Instantly switch between 1250, 2000, 3500, 4500, or 5000 dpi.
- Customize functions, macros and settings for up to 25 profiles for different gaming scenarios.
- Designed for gaming with soft & comfortable rubber painting

MRP ₹3,999 / Offer Price ₹2,999

ROG GX950 Gaming Mouse

Shift into precision gaming!

- Precision laser technology up to 8200dpi
- Instant and programmable DPI switch function from 50~ 8200dpi (Default 800/1600/3200/5600dpi)
- Five-way tangle free cable management with sleeve protection
- Gold-plated USB connector provides high speed data transfer rate.
- Designed for gaming with soft rubber painting and stylish coating
- Customizable DPI, button functions and macro commands
- User-adjustable mouse weight system

MRP ₹7,999 / Offer Price ₹5,999

65W - 02 Slim Adapter

Charge your laptop & Handheld device at the same time

- Twice slimmer than standard bundled power adapters: carries great everywhere
- Built-in USB 5V charging point so no additional adapters needed for smartphones and tablets
- Works with ASUS 65W and 40W notebooks, ultrabooks, and Eee PCs
- Plug and charge convenience wherever power is available!

MRP ₹1,999 / Offer Price ₹1,799

N65W 03 Adapter

Power to keep working everywhere

- Plug and charge convenience at any power point
- Compact, travel-friendly dimensions (8.8 x 8.8 x 3.05cm, adapter only)

MRP ₹1,999 / Offer Price ₹1,099

UT280 Wired Mouse

Shift into precision gaming

- Accurate 1000 dpi
- Precise optics
- Ambidextrous build
- Effortless USB 2.0

MRP ₹399 / Offer Price ₹299

ROG NOMAD Backpack

MRP ₹9,999/ Offer Price ₹8,775

ASUS EOS Carry Bag

MRP ₹1,499 / Offer Price ₹1,199

ARGO Backpack

MRP ₹1,499 / Offer Price ₹799

VersaSleeve Dress up in more style

- Dual-position and multi-angle cover for 17.7cm (7) pad
- Folding form factor enables handheld video watching and ergonomic typing
- Protective soft-touch polyurethane and microfiber interior keeps 17.7cm (7) pad safe
- Choose from four cool colours

It's a breeze turning your 17.7cm (7) pad into an even more portable and capable device. Give it the vibrant cover treatment and get going with greater confidence. Made of durable yet pleasantly soft and reassuring materials, this cover instantly infuses 17.7cm (7) pad with added flexibility. It's protective so you can do more and go further, plus switches forms between handheld and upright stances on the spot. Socializing to productivity and entertainment – all are more comfortable and better looking with the choice of four snazzy colours!
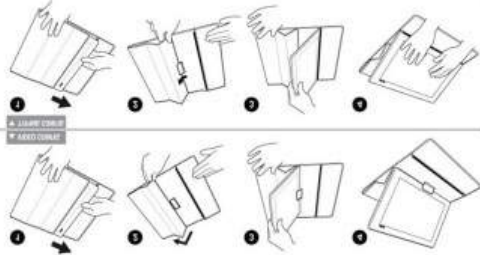

MRP ₹1,999 / Offer Price ₹1,799

Persona Cover Cover it in style!

- Tough yet soft snug-fitting polymer case protects your pad.
- Flexible non-slip matte texture provides great grip and protection against bumps and scrapes.
- Slim and light folder design means your pad still fits easily in your bag

MRP ₹1,199 / Offer Price ₹1,099

Ultra light but Protective

Light and soft polymer formulation means this folder-like cover is exactly what you need to protect your tablet front and back without adding bulk or weight.

Uninterrupted Enjoyment

Openings for all ports and connectors allow for uninterrupted enjoyment.

ASUS ZenPower Big Capacity Power Bank in a Compact and Premium Design

ZenPower 10050mAh

2.4A	1.8x	5000	11	3x	2x	1x
Output for Ultra Fast Charging	Longer Lifespan with JEITA Protection	USB Plug Test Cycle (USB insertion / removal)	Types of Protection	ZenFone 5 Full Charge	Zenfone 2 Full Charge	Nexus 7 Full Charge

ASUS introduces ZenPower, a power bank with a beautiful aluminium textured body with the size of a credit card, making at easy for you to get extra juice of power everywhere and anywhere you go.

Model: **ABTU005**

Battery Type
- Lithium-ion rechargeable cell

Input: DC 5V 2A
Output: **DC 5.1V 2.4A Quick Charging It can charge Tablet as well**

Rated Capacity
- 3.6V / **10050mAh**

Charging Time
- 6hrs with 5V/2A standard cable
- 9hrs with 5V/1A standard cable

Dimension
- 90.5 x 59 x 22 mm | Weight: 215g

Security Features
- Temperature Protection
- Short circuit Protection
- Reset Protection
- Input over Voltage Protection
- Output over Voltage Protection
- Input reverse direction protection
- Over charge/over discharge protection
- Output Over Current Protection
- Cell PTC Protection
- adapter protection
- Jeita Protection

Colours
- Osmium Black, Sheer Gold, Glamour Red, Azure Blue, Brilliant Silver

Accessories (sold separately)
- ZenPower Bumper | MRP ₹299
Available in Red Blue & Yellow
