REPUBLIC OF GAMERS

For those who dare

Welcome to Republic of Gamers. It’s a proving ground for the elite – a place where players and teams gather to celebrate camaraderie and gaming excellence. There’s no room for mediocrity or weakness here.

This is a call for those who dare venture, defy convention, and rebel against conformity. You rise up to challenges, and are not afraid to stare failure in the face, time and time again. You stand by your instincts, as well as alongside comrades in need. Republic of Gamers is for those who dare seek the impossible because ‘hard’ isn’t enough.

ROG is the Choice of Champions. If you dare, put on your game face and Join the Republic.

THE ROG LEGACY CONTINUES

ROG R&D engineers are hardcore gamers, too. We know gaming, and we are constantly striving to develop products that gamers need. Our goal: give gamers the ultimate gaming hardware.

THE LATEST 9TH
GENERATION INTEL
CORE PROCESSORS

Exceptional platform performance

The latest ROG gaming machines are powered by the latest 9th Generation Intel® Core™ processors for unrivaled performance and astounding visuals, ensuring the very best gaming experience.

ROG Zephyrus series gaming laptops feature the latest Intel® Core™ i9-9750H. Its six cores processor reaches speeds of up to 4GHz with Turbo Boost 2.0 technology, while Hyper-Threading enables up to 12 parallel threads to accelerate heavy multitasking.

*Performance may vary based on different system configuration.

ROG Mothership has enough processor power to mix gaming with CPU-intensive streaming, or to tackle serious work like content creation and 3D rendering. Its Intel® Core™ i9-9980HK is typically limited to 4.2GHz when all eight cores are engaged, but we crank it to 4.7GHz out of the box. And the chip is fully unlocked, so you can push even higher with just a few clicks in our Armoury Crate software.

For ROG Strix series gaming laptops, it features the latest Intel® Core™ i9-9880H CPU. This 8-core process pushes frequencies as high as 4.16GHz with a single core, and Hyper-Threading enables up to 16 parallel threads to accelerate heavy multitasking. *Performance may vary based on different system configuration.

SUPERFAST
SSD & SSHD
STORAGE

The latest M.2 NVMe PCIe® 4.0 x4 SSD provides data read and write speeds of up to 3190MB/s and 1235MB/s respectively. When compared to a SATA III SSD, the M.2 SSD offers 5.67X faster read speeds and 4.6X faster write speeds so everything you do feels faster.

INTEL®
THUNDERBOLT™ 3

Super-fast transfer speeds with Thunderbolt™ 3 USB Type-C

Intel® Thunderbolt™ technology gives you single-cable data and signal transmission rates of up to 40Gbps – 4x the bandwidth of USB 3.1.

ROG laptops feature both Intel Thunderbolt 3 and USB Type-C for increased compatibility with your various devices.

EXCLUSIVE ROG HYPERDRIVE TECHNOLOGY

Exclusive ROG HyperDrive technology features blazing-fast data read and write speeds to get you into the game before everyone else. ROG Zephyrus includes the latest NVMe and PCIe® technologies to quick data access and transfer rates at speeds of up to 3200MB/s for superfast game load times, so you spend less time waiting and more time gaming!

*ROG HyperDrive is only available on Zephyrus series models.

ROG Mothership series goes a step further, with ROG HyperDrive Extreme technology to combine up to three NVMe PCIe 4.0 x4 SSDs with the world’s fastest RAID 0 storage available in a gaming laptop – so your games load up faster.

Having two out of the three SSDs directly connected to the CPU helps avoid DMI bottlenecks, allowing for speeds of up to 8700MB/s.

*ROG HyperDrive Extreme is only available on ROG Mothership and G703 models.

* Actual performance may vary according to system configuration.

* Intel 760p SSDs are required for the two CPU-attached slots for a RAID 0 setup comprising of three NVMe PCIe 4.0 x4 SSDs.

PROART™ TRUECOLOR TECHNOLOGY FOR SPECTACULAR VISUALS

Inside the slender frame sits one of two gorgeous IPS-level panels. HDR powers premium AAA titles with richer colors, brilliant whites, and deeper blacks via local dimming. The SDR alternative gives content creators accurate, Pantone Validated colors with factory calibration and ROG-exclusive ProArt™ TruColor Technology. Both boast silky smooth 240Hz refresh rates with blur-free 3ms response times.

*Users may choose between HDR or Pantone® Validated display according to different countries.

TURN UP THE HI-RES AUDIO

Redesigning the form factor lets us arrange four speakers along the front edge to fire high-quality sound directly at you. ROG’s audio is powered by a premium ESS® Sabre HiFi DAC with Hi-Res Audio certification. Smart amplification lets you pump up the volume without damaging the speakers, while virtualization simulates surround sound for stereo devices like headphones and VR headsets.

TRUE COLOR AND SPEED ON A 240HZ DISPLAY

Outstanding colors and smooth gameplay unite in the vibrant 240Hz/3ms IPS-level display. The 15.6-inch panel is framed by slim 6.2-mm bezels, creating an 81% screen-to-body ratio that feels expansive. Combining full sRGB coverage with wide viewing angles makes the screen ideal for showcasing visual projects and media. The fast 240Hz refresh rate enables true high-FPS gameplay, while the 3ms grey-to-grey response time ensures crisper, cleaner graphics even during intense, fast-paced matches.

*Actual product may vary depending on different configurations
INTELLIGENT COOLING IMPROVES YOUR EXPERIENCE

Cooling built from the ground up

ROG Motherboard
Standing firm faster that increases airflow for desktop replacement

ROG Strix
Innovative 3D FlowZone Design and anti-glare cooling improves system longevity

ROG Zephyrus
Active Aerodynamics System (AAS) keeps outside vents for improved airflow

Optimized Software
Seamless switching between (optimized) profiles

Turbo mode
Uses the highest speed to sustain maximum speed

Balanced mode
Adapts to the workload for gaming

Silent mode
Nurture quieter for light work and entertainment

Optimized Hardware
Best mix of hardware for chassis and components

INTELLIGENT COOLING MEANS MORE FPS

ROG uses a strategic mix of hardware and features to achieve ideal cooling for each combination of components and chassis, combined with smart software that optimizes your experience for work and play.

BOOST PAST THE COMPETITION

Maximize GPU performance
Modern GPUs can run at a range of clock speeds and wattages depending on the config. Our suite of Intelligent Cooling techniques lets us push GPUs to the top of that range and in some cases into factory overclocked territory. Elevating the frequency and power envelope with ROG Boost gives gamers higher frame rates and an edge over the competition.

COOLZONE KEEPS KEYBOARDS COMFORTABLE

Laptop keyboards can become uncomfortably hot during marathon gaming sessions. Venting by the WASD keys allows the fan beneath to generate airflow through the board, keeping your crucial inputs cool.
RANGEBOOST FOR ZERO-DEAD-SPOT WI-FI CONNECTION

ROG Strix gaming laptops are the first in the world to feature multi-antenna Wi-Fi for 30% more range, higher Wi-Fi throughput, and fewer connection drops. Patented ROG RangeBoost technology combines four antennas located at the back and front of the machine with a unique algorithm that constantly scans and selects the best pair of antennas able to cover each other’s dead spots, resulting in the strongest possible signal. The latest 802.11ac Wave 2 Wi-Fi standard delivers speeds of up to 1.7Gbps — twice that of 802.11ac 2x2 and 12x that of 802.11b/g/n!

SELF-CLEANING COOLING SUSTAINS PERFORMANCE

Keeping key cooling components free from dust is crucial to sustaining long-term system stability. Anti-dust tunnels channel debris out of the chassis, preventing build-up to preserve performance.

DISSIPATE THE HEAT

Sintered heatpipes are carefully arranged to draw heat away from the CPU, GPU, and VRM supplying power. Multiple heatsinks with ultra-thin fins increase surface area to maximize thermal dissipation.

MORE BLADES AMPLIFY AIRFLOW

Higher densities allow n-Blade fans to move more air with each rotation. The blades must be incredibly thin, so they’re made from a special liquid-crystal polymer strong enough to withstand high RPMs.

STRIX SCAR EDITION FEATURES THE LATEST 802.11AC 2X2 WAVE 2 WI-FI STANDARD, WITH TWO ANTENNAS EACH FOR BOTH TRANSMISSION AND RECEPTION, FOR SPEEDS THAT ARE UP TO 1.7 Gbps, THAT’S 2x FASTER THAN 802.11AC 2x2 AND 12x FASTER THAN 802.11B/G/N. THE 2X2 WIRELESS CONFIGURATION PROVIDES UP TO 30% MORE COVERAGE THAN THE 1X1 CONFIGURATION. A MORE RELIABLE AND ROBUST WIRELESS CONNECTION ENSURES BETTER GAMING EXPERIENCES. ROG FIRST ALSO ENSURES ROG ROUTERS AND ASUS RT-SERIES ROUTERS PRIORITIZE PACKETS ACCORDING TO THE GAMEFIRST V SETTINGS IN YOUR ROG LAPTOP FOR FASTER, MORE STABLE CONNECTIONS. STRIX SCAR EDITION EVEN HAS LOW-ENERGY BLUETOOTH® 4.1, ENABLING YOU TO GAME LONGER AND MORE RELIABLY WITH YOUR BLUETOOTH PERIPHERALS!

* Specifications may vary according to configuration.

12X faster
AURA SYNC FOR ULTIMATE PERSONALIZATION

Aura Sync technology gives you the freedom to customize and sync up light effects with Aura Sync-supported gaming mice, headsets, and other peripherals to give your entire gaming setup a consistent look and feel. With a full spectrum of colors to choose from, as well as eight different lighting modes that can be accessed via Armoury Crate, Aura Sync technology lets you express your gaming persona, or the feel of the game you’re currently playing.

AURA RGB PER-KEY

Exclusive Aura RGB lighting technology allows you to customize light effects right down to individual keys via Armoury Crate. You can even create unique color patterns for each game to help you find and master its controls.

UNIFIED SYSTEM CONTROL WITH ARMOURY CRATE

The brand-new ROG Armoury Crate software unifies system and lighting control and puts them at your fingertips. Its user-friendly interface lets you manage up to four gaming profiles that automatically load your preferred settings when you launch your favorite titles. These options are the beginning for what will become an even more versatile tool.

*Effects may vary by models

 Aura Core
Customize your RGB keyboard

Fan Settings
Control noise levels and power consumptions

XSplit Gamecaster
Stream and broadcast directly to International streaming platforms

Android iOS App
Access Armoury Crate from your smartphones

GameFirst V
Network-optimization software for gameplay

GameVisuals
Adjust different presets in different genres

Sonic Studio III
Immersive in-game audio software

Sonic Radar III
A perfect tool for practice rounds and tuning untrained ears

*Effects may vary by models
EXTREME TESTING

All ROG notebooks go through a series of durability tests to ensure toughness and reliability. They’re tested under extreme conditions and situations to ensure they’re always up to the high standards expected of ROG gear.

PRESSURE TEST
Premium panels must be able to handle limited spaces such as suitcases without causing damage, panel pressure testing ensures ASUS ROG Notebooks only use the best panels.

OVERCLOCKING TEST
Overclocking puts a lot of strain on system components, often resulting in overheating. ASUS ROG laptops and desktops are subjected to stringent temperature and performance tests in a specially-designed foam-lined heat box to ensure they live up to gamers expectations and the high quality standards demanded by ASUS.

VIBRATION TEST
Riding on bumpy roads, some PCs may start falling apart. But not our ASUS ROG Notebooks! Harsh vibration testing ensures parts stay put and performance remains consistent even when everything starts shaking!

KEYBOARD TEST
Express yourself confidently thanks to our extreme keyboard durability tests, where special robots punch each key to check its feedback and lastability even in the face of some brutal input that may happen!

TWIST TEST
Twist test checks chassis rigidity. Grabbing the notebook with one hand? No problem, this trial checks for uneven twist force endurance to give you the flexibility you need when using your ASUS ROG Notebooks.

TEMPERATURE TEST
All ROG gaming laptops are subjected to strict thermal tests to ensure smooth and stable performance under the most demanding loads.

ROG BLUEPRINT

STRINGENT QUALITY CONTROL

DROP TEST
ASUS quality means our ROG Notebooks are able to handle drops without suffering any kind of damage to internal components or external design, far beyond industry standards for free fall resistance.

NOISE TEST
Abrasive noise tests check for loud fans, storage, even power delivery buzz, hushing them to create quiet ROG Notebooks. The entire chassis then passes audio tuning to deliver the best sound possible.

SHOCK TEST
Shock test simulates incident that may occur during shipping. Here in ASUS, our engineers make sure ASUS ROG Notebooks survive these with no performance penalty.

ACCELERATION TEST
HALT test stands for Highly Accelerated Life Test, and expresses notebooks through their typical life cycle to ferret out problems, with extensive analysis conducted by engineers.

ADVANCED HINGE TEST
Notebook lid hinges are weak spots. Use cheap materials and they’ll snap. Vigorous hinge testing conducts thousands of open/close cycles, making sure hinges last for long.

PORT TEST
Port test ascertains contacts and plugs are solid for frequent plugging / unplugging and can handle cable quality variations without data transfer and fidelity degradation.

ABRASIVE TEST
Abrasive resistance test subjects ASUS ROG Notebook exteriors to friction, indicating colors and surface materials stay at prime condition even after extensive and demanding usage.

*Note: Game recommendations are based on GPU performance over 60 FPS on Medium/High Setting. Gaming performance may vary based on system configurations and settings. GPU from High (Top) to Low (Bottom). Higher GPU will result in better gaming performance.*
PLAY IT COOL

Huracan features all intakes at the front, top and underside of the chassis. Opening the cover adds to that, allowing the maximum amount of cooling air into the chassis. It increases airflow by 16% and reduces internal temperatures by 15% to help cool critical components. Huracan gives you exactly what you want for gaming – a compact desktop that runs cool and quiet without compromising performance.

EXTRAORDINARY GAMING EXPERIENCES

To make sure Huracan gives you the very best gaming experience, ROG engineers play-tested the latest AAA games and the results are stellar: With ‘Ultra’ graphics settings, Huracan ran Destiny 2 in QHD at up to 100fps, and in 4K UHD at an astounding 60fps.

* Tested on Huracan with an 8th Gen Intel Core i7-8700 CPU, GeForce GTX 1080 GPU, and 32GB DDR4 RAM.

All prices quoted above are inclusive of 4% Sales & Service Tax (SST). Price, specification and availability are subject to change without prior notice.

Uncover gaming supremacy

SYNCHRONIZED AURA SYNC LIGHTING

Customizable Aura light effects gives you a palette of 16.8 million colors so you can match the look and feel of Huracan to the game you’re currently playing. Aura Sync technology gives you the freedom to mix and match light effects with Aura Sync-supported gaming mice, headsets, keyboards, monitors, and other peripherals to create a coordinated gaming setup.

Extraordinary gaming experiences

To make sure Huracan gives you the very best gaming experience, ROG engineers play-tested the latest AAA games and the results are stellar: With ‘Ultra’ graphics settings, Huracan ran Destiny 2 in QHD at up to 100fps, and in 4K UHD at an astounding 60fps.

* Tested on Huracan with an 8th Gen Intel Core i7-8700 CPU, GeForce GTX 1080 GPU, and 32GB DDR4 RAM.

**REBIRTH OF A GAMING BEAST**

The newly re-engineered ROG Strix GL12CX further pushes the limits of extreme gaming performance and features a striking, unconventional design. This Windows 10 gaming desktop now boasts the latest 9th Generation Intel® Core™ i7-9700K factory-overclocked processor and NVIDIA® GeForce® RTX 2080 graphics for unrivalled gaming experiences.

It features the ROG-exclusive DIMM.2 module with support for dual SSDs that can be configured in RAID, along with tool-free expansion bays and an esports-ready hot-swap SSD tray for easy upgrades. A transparent side panel and Aura Sync lighting effects let you customize the colors of Strix GL12CX, inside and out.

**KEEP IT COOL UNDER PRESSURE**

ROG Strix GL12CX provides robust cooling for epic gaming marathons. Its intelligent cooling system features two dedicated isolated air chambers to improve heat dissipation. Strix GL12CX includes the innovative interwoven HyperStream design that allows for maximum heat removal and airflow into the chassis. In addition, the three fans on the top and bottom of the chassis ensure constant airflow through the system to keep the power supply and storage drives cool in the heat of battle.

**UNIFIED SYSTEM TUNING AND PERSONALIZATION**

ROG Armoury Crate puts all essential system and lighting control at your fingertips in a single utility. You can easily change settings for both and define up to four game profiles that automatically make adjustments when you launch your favorite titles. Armoury Crate even lets you manually overclock ROG Strix GL12CX beyond the processor’s factory-overclocked speeds. These options are just the beginning for what will become an even more versatile tool.

**ARMED AND READY**

Keep up with the arms race and make sure your arsenal’s up to date with an upgrade-friendly design. ROG Strix GL12CX has plenty of room for expansion: a clever internal layout gives you space for additional fans and storage drives, with proper cable management to keep things neat and organized. You don’t even have to open up the case when you want more storage space; simply pop a drive into the hot-swap 2.5-inch SSD tray.

### Windows 10

### UNIFIED SYSTEM TUNING AND PERSONALIZATION

ROG Armoury Crate puts all essential system and lighting control at your fingertips in a single utility. You can easily change settings for both and define up to four game profiles that automatically make adjustments when you launch your favorite titles. These options are just the beginning for what will become an even more versatile tool.

### DUAL-CHAMBER S-SHAPE DESIGN

The chassis adopts a dual-chamber S-shape design meaning that the main components, including the CPU, the motherboard and the graphics card are isolated from where the HDD and power supply unit are stored so that the internal thermal channels will not warm up one another resulting in improved thermal performance.

### TESTED FOR QUALITY AND PROVEN FOR RELIABILITY

Each ROG GL10CS is subjected to a series of rigorous quality tests, including drop and vibration, thermal, noise, and voltage testing to ensure it meets our exacting standards, and surpasses those of the competition. From the internal structure to the individual components and from mechanical design to electrical safety is tested to make sure the device you receive serves you reliably for years to come. The user comfort tests such as noise tests are carried out to isolate and optimize sound pressure and tones in different performance modes and scenarios to provide you with a comfortable experience even in the most demanding applications.
ROG GAMING LAPTOPS

ROG MOTHERSHIP

Price: RM26,999

STAND TALL TO BREATHE DEEPER

Laptops have limited airflow because most intake is from vents under the chassis, where there’s little room to breathe, but ROG Mothership’s unique design inhales cool air freely from the back. Standing tall lowers temperatures by up to 14°C*, and liquid metal takes CPU cooling to the next level. Seamless switching between Scenario Profiles optimizes performance and acoustics for the task at hand.

TAKE THE LATEST HARDWARE TO THE NEXT LEVEL

Take the latest hardware to the next level. ROG Mothership raises the bar with a factory overclocked GPU and CPU that are unlocked for further tuning. The GeForce RTX™ 2080 boosts up to 1880MHz at 200W, and its RGB of GDDR6 VRAM is clocked at 7200MHz, setting a new standard for laptop gaming and VR performance, while the 9th Gen Intel® Core™ i9 CPU unleashes eight cores and 16 threads on heavy workloads.* They’re paired with up to three NVMe SSDs in RAID 0, with two drives connected to the CPU to reach an insane 8700MB/s.

HAVE THE KEYBOARD YOUR WAY

Gaming desktops let you set the keyboard at just the right angle, and ROG Mothership offers the same freedom. Its keyboard easily pulls away from magnetic anchors and can run wirelessly on 2.4GHz or tethered via USB Type-C. Fast-fitting

RETHINK THE FORM FACTOR

Each aluminum unibody is milled to perfection with a precise CNC machining process. A stepless hinge lets the chassis stand tall or lean back to suit any setting. The versatile design enables different usage scenarios: detach and reposition the keyboard for your ideal gaming stance, or remove it to connect desktop peripherals. ROG Mothership can deploy on the road or power a full battlestation at home.

ULTRAFAST 144Hz/3ms NVIDIA® G-SYNC™ DISPLAY

Immerse yourself in gorgeous graphics on the 17.3” IPS-level display. The Full HD panel’s 144Hz refresh rate and 3ms response time are tailored for fast-paced games, while G-SYNC™ technology delivers smoother gameplay with lower input lag and no tearing. ROG-exclusive software lets you switch between modes that offer the best gaming experience with G-SYNC™ or longer battery life with Optimus, so you can choose the right one to suit the situation.

Prices, while all specifications are subject to change without prior notice. Errors, whilst unlikely to occur, are subject to change without prior notice.

**Bundle:** Backpack + Headset + ROG Gladius Mouse (worth RM899)

**Desktop-Grade Performance**

With performance rivaling that of gaming desktops, G703 is powered by up to a factory-overclocked Intel Core i9-9980HK processor that’s been factory-overclocked for speeds of up to 5.0GHz. Its RTX™-2080 graphics and 8GB GDDR6 VRAM are also factory-overclocked.

**Smooth and Seamless Gaming**

G703 features the most responsive IPS-level laptop display available. The 17.3-inch panel features a 144Hz refresh rate and G-SYNC technology for smooth and seamless graphics. The ultrastiff 3ms GTG response time reduces motion blur, enabling G703 to handle the latest AAA gaming titles at Ultra graphics settings without visual tearing, lag, ghosting or obvious frame rate stutter.

**Fastest Ever Storage on a Laptop**

HyperDrive Extreme storage uses exclusive technology to combine up to three NVMe PCIe 3.0 x4 SSDs, providing G703 with the world’s fastest RAID 0 storage configuration available in a gaming laptop. Having two out of the three SSDs directly connected to the CPU helps avoid DMA bottlenecks, allowing for data access speeds of up to 9700MB/s.

**The Patented Anti-Dust Cooling System**

The patented Anti-Dust Cooling (ADC) system enables G703 to clean itself of harmful dust and particles. Acting like an immune system, dust, dirt and other particles are ejected from the chassis through two dedicated tunnels via centrifugal force, preventing build-up in the thermal fins to increase system stability and lifespan. Two high-performance, dual-outlet fans blow air through ultrathin fins, while the unique heat-pipe architecture cools the CPU, GPU and chipset power components independently.

**Aurora RGB Lighting Keyboard**

Exclusive Aurora RGB lighting technology allows you to customize light effects right down to individual keys. You can even create unique color patterns for each game to help you find and master its controls. The keyboard used in G703 features N-key rollover and anti-ghosting technologies to provide precise control, while a 2.9mm travel distance, a 0.3mm keycap curve, and a durable anti-slip palm rest ensure you stay comfortable.

**NVIDIA® GeForce RTX™ 2080**

NVIDIA Turing™ architecture offers incredibly photorealistic graphics, thanks to AI-enhanced image processing Tensor Cores and real-time ray tracing technology.

---

**ROG GAMING LAPTOPS**

**G-SYNC**

**AURORA SYNC FOR ULTIMATE PERSONALIZATION**

Zephyrus S has a keyboard that sits right at the front of the chassis—a design that allows for better cooling of internal components. It features anti-ghosting and N-key rollover so all keystrokes are correctly logged. A touchpad situated to the right of the keyboard features a numeric keypad function that can be easily activated by a hotkey. Aura Sync provides six dynamic and customizable light effects by individual keys, and can be synchronized with other Aura Sync-compatible products to create a gaming setup with a consistent look and feel.

**ROG-EXCLUSIVE COOLING SYSTEM - AAS**

The exclusive Active Aerodynamic System (AAS) allows Zephyrus S to run cooler and quieter without sacrificing performance. It incorporates unique AeroAccelerator (AA) and Anti-Dust Cooling technologies, and powerful 12-volt fans to increase the speed and efficiency of airflow through the laptop. The fans feature a curved fan shroud designed to enhance airflow to channel heat away from internal components more effectively. When Zephyrus S is opened, a portion of the bottom of the chassis flexes to increase the airflow volume by 20%.

**QUICKLY SWITCH GEARS FOR WORK AND PLAY**

Live a double life powered by the ROG-exclusive GPU switch. With just a few clicks, ROG Zephyrus S transitions between better gaming and longer battery life. G-SYNC® mode synchronizes the GPU and display to deliver smoother gameplay with lower input lag and tear-free graphics, while Optimus mode selectively turns off the discrete GPU to save power with everyday desktop productivity and entertainment.
Clever design and expert craftsmanship are required to put high-end chips into the slimmest gaming laptop ever. At just 15.35~16.15mm thin with a GeForce RTX™ 2080 with Max-Q design GPU, ROG Zephyrus S is portable and power enough for life on the go. In one fluid motion of hidden scissor-door hinges, it transforms from svelte sidekick to gaming powerhouse.

**WORLD’S SLIMMEST 15” RTX GAMING LAPTOP**

SHRINKING BEZELS WITHOUT SACRIFICING SPEED

Super-narrow bezels draw you deeper into the action on the 240Hz IPS-level display. The high refresh rate makes gameplay smoother and lowers input lag, while the 3ms gray-to-gray response time produces sharper visuals with no blurring. With the full sRGB color gamut and wide viewing angles, ROG Zephyrus S blends speed and beauty without compromise.

**COOL UNDER PRESSURE**

The unique ROG Active Aerodynamic System (AAS) expands to help Zephyrus S sustain high GPU clocks with demanding games. Lifting the lid opens a 5-mm intake that increases airflow by up to 22% compared to traditional designs. Anti-dust tunnels keep the four heatsinks clean to preserve cooling performance and system stability as the hours add up.

**AURA SYNC BEYOND THE GAMING KEYBOARD**

The keyboard ensures precise input in the heat of battle, and it’s built to last. You can customize the backlight colors and effects to suit your style, and another configurable RGB zone illuminates the AAS intake at the back. Aura Sync harmonizes lighting across compatible ROG mice, headsets, and other peripherals to give your setup a cohesive look.

**ROG Zephyrus S (GX502)**

**G-SYNC**

**More games. More fun.**

**Intelligent Cooling Improves Your Experience**

ROG’s Intelligent Cooling philosophy mixes the right features and system settings to ensure the best experience for the chassis and components, no matter what you’re doing. In the Zephyrus S GX502, our innovative Active Aerodynamic System (AAS) opens additional vents to increase airflow by 22%, while the self-cleaning thermal module ejects dust to improve longevity. ROG Armoury Crate software seamlessly switches between operating modes to optimize performance and acoustics for the task.

**GPU Switch Adds Adaptability**

Live a double life with our unique GPU switch. This exclusive ROG technology gives you the freedom to improve your gaming experience with G-SYNC™, which reduces stuttering and eliminates tearing, or get better battery life with Optimus, which intelligently turns off the GPU to save power. The Zephyrus S GX502 is capable of reaching up to 8 hours of battery life, so you can unplug and take work and entertainment with you anywhere.

**True Color and Speed on Display**

Exceptional color accuracy and responsiveness set this 15.6-inch panel apart from the competition. Fast-paced games run smoothly with crisp graphics thanks to the blazing fast 240Hz refresh rate and 3ms response time. Slim bezels surround the IPS-level display, expanding your visual immersion, while factory calibration with ProArt™ TruColor Technology ensures a Pantone® Validated palette across the full sRGB color space for all of your professional pursuits and portfolio projects.

**Your Keyboard, Your Style**

Designed for precise input, the desktop-style keyboard features spaces between function keys for intuitive identification, dedicated hot keys to keep vital commands close at hand, and N-key rollover to accurately register simultaneous presses. Per-key RGB customization is excellent for highlighting critical keys for different games, and workflow-specific shortcuts that save time. Aura Sync lets you coordinate colors and visuals across compatible devices to make your gaming environment your own.

**World’s Slimmest 15” RTX Gaming Laptop**

The impressively lightweight form belies heavyweight power. At 18.9mm thin and under 2kg, the Zephyrus S GX502 is 25% thinner and 42% lighter than typical 15” laptops. But it refuses to compromise between work and play, delivering dynamic performance and refined styling that’s truly the best of both worlds. Its sleek, reinforced metal chassis makes it resilient against everyday use and wear, while the subtle, soft-touch skin along the palm rest keeps it looking clean and professional for work anywhere.

DO MORE ON THE MOVE

Longer battery life makes true portability a reality in the versatile ROG Zephyrus M. Unplug and take full advantage of its easy-to-carry form factor with up to 8 hours of battery life on a single charge. NVIDIA Optimus technology improves efficiency by intelligently turning off the discrete GPU when dedicated graphics power isn’t required, giving you more battery life for everyday work and productivity without slowing gaming performance.

TAP INTO PORTABLE TYPE-C POWER

USB Power Delivery supports secondary charging from portable power packs, so you don’t have to fight for a socket when the battery gets low. Fast-charging support reverses the direction, using up to 3A to quickly rejuvenate smartphones and other devices. If you’re not loading the CPU or discrete GPU with intensive tasks, you can use a smaller adapter up to 65W that lightens your load on the road.

INTELLIGENT COOLING IMPROVES YOUR EXPERIENCE

ROG’s Intelligent Cooling philosophy mixes the right features and system settings to ensure the best experience for each chassis and components, no matter what you’re doing. The Zephyrus M’s self-cleaning thermal module ejects dust to improve longevity, dual n-Blade fans spin 83 blades to increase airflow, and ultra-thin fins expand the surface area for heat dissipation. ROG Armoury Crate software seamlessly switches between operating modes to optimize performance and acoustics for the task.

THE KEYS TO CUSTOMIZATION

Type in style with a desktop-inspired keyboard made for gaming. Function keys are spaced and grouped for easy identification alongside dedicated hot keys that keep essential commands within easy reach. Full N-Key rollover ensures that simultaneous presses register correctly, increasing precision. Highlight key controls for different games and workflows with per-key RGB customization, and coordinate colors and visual effects across all of your compatible peripherals with Aura Sync.

SLEEK, STRONG, AND ULTRA-SLIM

The impressively lightweight form belies heavy-duty power. At 18.9mm thin and 1.9kg, the Zephyrus M GU502 is 25% thinner and 42% lighter than typical 15” laptops. But it refuses to compromise between work and play, delivering dynamic performance and refined styling that’s truly the best of both worlds. Its sleek, reinforced metal chassis makes it resilient against everyday use and wear, while the subtle, soft-touch skin along the palm rest keeps it looking clean and professional for work anywhere.

WORK HARD. PLAY HARD.

Intelligently configured and expertly tuned, the ROG Zephyrus G starts with a quad-core AMD Ryzen™ 7 3750H CPU that slices through serious work and everyday multitasking. It’s paired with a GeForce® GTX 1660 Ti discrete GPU that boosts up to 1335MHz at 60W to provide ample horsepower for a wide range of popular games and VR experiences. With up to a 512GB NVMe PCIe® SSD, there’s plenty of super-fast storage to accelerate load times for your growing game library and professional portfolio.

LONGER LIFE ON THE GO

The ROG Zephyrus G strikes a perfect balance between power and portability. Its energy-efficient AMD Ryzen™ APU provides enough power for serious gaming, while also supplying sufficient battery life for up to nearly 7 hours of 1080p video playback or 5.5 hours of Wi-Fi web browsing*. Spend less time plugged in to a wall socket and more time on the move, surfing, streaming, and playing.

INTELLIGENT COOLING IMPROVES YOUR EXPERIENCE

ROG’s Intelligent Cooling philosophy mixes the right features and system settings to ensure the best experience for each chassis and components, no matter what you’re doing. The Zephyrus G’s self-cleaning thermal module ejects dust to improve long-term stability, while dual n-Blade fans 83 blades each to generate impressive airflow within the slim frame. ROG Armoury Crate software seamlessly switches between operating modes to optimize performance and acoustics for the task.

A STROKE OF GAMING GENIUS

Gamers will feel right at home with the keyboard’s desktop-inspired layout, which has separate function blocks for intuitive identification, plus dedicated hot keys that put volume, microphone mute, and ROG Armoury Crate software within easy reach. Overstroke technology triggers higher in each keystroke for faster response times, and n-key rollover registers every press precisely in the heat of battle. Work or play into the night illuminated by the pristine glow of clean white backlighting.

SLEEK AND PORTABLE

Streamlined design and stealthy styling help the ROG Zephyrus G blend in everywhere from battlestations and LAN parties to classrooms and coffee shops. Travel effortlessly between them with a compact body that’s just 20mm thin and 2.1kg. Slim bezels fit the 15” display into a 14” chassis that’s easy to carry in crowded bags and tight spaces, and the narrower footprint leaves more room for mousing on messy desks. Though quietly confident, the understated looks remain unmistakably ROG.

INTRODUCING THE KEYSTONE

FORWARD-THINKING FUNCTIONAL DESIGN

Efficiency and innovation unite in the sleek, gunmetal grey ROG Strix SCAR III. Its strategic design is inspired by our collaboration with BMW Designworks Group, and carves out a cooling advantage with its 3D Flow Zone. The subtle, carbon-patterned interior is accented by Aura Sync lighting that extends across the new wraparound light bar, keyboard, and ROG logo. Whether you’re gearing up for competition or hopping into quickplay, this metal-capped machine is fine-tuned and ready for action.

Keystones offer a versatile new way to personalize your machine and protect your personal data. These physical, NFC-enabled keys fit neatly into the Strix SCAR III’s chassis, adding a subtle accent along the trim. When docked, they instantly transform your machine with different effects and game-specific profiles, or unlock access to a secret Shadow Drive for covert private storage. This is only the beginning of the Keystone’s potential. Glimpse the future today.

SEE THE GAME AT PROFESSIONAL SPEED

Play at the speed of professional esports with the world’s fastest gaming laptop display. The 240Hz panel enables true high-FPS gameplay capable of keeping up with competitive gaming at the highest level. Stay in the flow of fast-paced action with impeccably smooth, crisp visuals that heighten your immersion. Get an edge in combat where rapid response and environmental awareness are crucial to victory. Experience games the way the pros do, and take your skills to the next level.

INTELLIGENT COOLING IMPROVES YOUR EXPERIENCE

ROG’s Intelligent Cooling philosophy mixes the right features and system settings to ensure the best experience for each situation. The Strix SCAR III augments its well-ventilated exterior with a self-cleaning thermal module that ejects dust to improve longevity. Dual n-Blade fans spin 83 blades to increase airflow, and ultra-thin fins expand the surface area for heat dissipation. ROG Armoury Crate software seamlessly switches between operating modes to optimize performance and acoustics for the task.

Bundle: Backpack + ROG Impact Mouse (worth RM699)
Inspired by our collaboration with BMW Designworks Group, the Strix G melds form and function with a 3D Flow Zone that offers cutting-edge cooling you can see. Contrasting brushed finishes slice across the lid, accenting an asymmetrical cut-out that ensures unrestricted airflow around the back, where scissor door hinges make room for additional venting. The sculpted shape and stealthy surfaces add low-key style that you can accentuate with an optional light bar that wraps RGB around the edges.

ROG’s Intelligent Cooling philosophy mixes the right features and system settings to ensure the best experience for each situation. The Strix G augments its well-ventilated exterior with a self-cleaning thermal module that ejects dust to improve longevity. Dual N-Blade fans spin 83 blades to increase airflow, and ultra-thin fins expand the surface area for heat dissipation. ROG Armoury Crate software seamlessly switches between operating modes to optimize performance and acoustics for the task.

Durability and precision define the desktop-inspired keyboard. Built with gamers in mind, it features spaced function keys for intuitive identification and dedicated hot keys for quick access to essential commands. Highlighted WASD keys* and 1-zone RGB lighting allow for easy visual navigation to crucial controls and shortcuts. With the toughness to last over 20 million keypresses, the Strix G can maintain its accuracy over a long lifespan of serious gaming.

Victory comes down to just fractions of a second. Catch every moment of battle at up to 144Hz on the formidably fast gaming display. The rapid refresh rate makes full use of the powerful GPU, unleashing its potential for silky smooth graphics at truly high FPS. Framed by super-narrow bezels, the display gives you an expansive view of every encounter. With the superior visual accuracy and immersion, you can set your sights on being the last player standing.

Bundle: Backpack (worth RM399)
EXTREME IMMERSION ON AN ULTRAFAST DISPLAY
The new NanoEdge design has a slimmer-than-ever 6.5mm bezel* for extremely engaging visuals in a much more compact package. FX505 features an ultrafast IPS-level panel for super smooth gameplay with minimal motion blur. Wide-view technology ensures consistent colors when you’re viewing the screen from extreme angles.

TOUGHER THAN STANDARD
Infused with the spirit of The Ultimate Force (TUF), FX505 has passed a series of rigorous military-grade MIL-STD-810G durability tests*, successfully surviving varying conditions including solar radiation exposure, high altitude, and temperature extremes. It’s certified to endure day-to-day use from accidental knocks to sudden drops on a desk. Durable and stable, FX505 has been pushed to the limit to ensure only the very best for gamers.

HYPERCOOL TECHNOLOGY IMPROVES DURABILITY
ASUS-exclusive HyperCool technology* consists of the Anti-Dust Cooling (ADC) system and Fan Overboost technology to ensure exceptional cooling during gaming marathons. Cooling is also improved by the patented trapezoid-cut lid and intelligent parallel fan placement.

RGB-BACKLIT KEYBOARD
FX505 has a keyboard that’s optimized for gaming, featuring RGB backlighting* across all zones that can be controlled via the TUF Aura Core panel so you can express your own unique style. Exclusive HyperStrike technology ensures more accurate typing and improved ergonomics thanks to a desktop-inspired layout with a highlighted WASD key group, broader space bar, isolated arrow keys, and recognizable gaps between the function keys. In addition, Overstroke technology registers keystrokes faster for precise and effortless control.

MORE GAMES. MORE FUN.
ROG PHONE II
GAME CHANGER

PLAY COOL. PLAY FAST. TOTAL CONTROL

PERFORMANCE

DOMINATING PERFORMANCE

ROG Phone II is powered by the world’s fastest Qualcomm Snapdragon 855 Plus Mobile Platform, with a 2.96GHz clock speed and up to 12GB RAM for effortless gaming power. The latest Adreno™ 640 GPU brings faster display throughput and greater power efficiency to the table, making ROG Phone II a graphics powerhouse that’s unfazed by demanding visuals.

NON-STOP STAMINA

The monster 6000mAh battery in ROG Phone II gives you non-stop gaming power, wherever you are. ROG HyperCharge direct-charging technology — which takes the charging circuitry out of the phone and puts it in the special 30W charger — gives ROG Phone II shorter and safer charge times.

PLAY FAST. SUPER-SMOOTH

120HZ VISUALS

ROG Phone II takes gaming visuals to the next level with the world’s first 120Hz/1ms AMOLED HDR display, a truly magnificent 6.59-inch screen that delivers unbelievably fluid, blur-free gaming and entertainment.

This is ASUS' commitment to deliver quality and customer satisfaction to you, wherever you might be in this world.

Perfect Warranty Program is created to help protect device against damages such as: liquid spills, electrical surges, drops, and accidental breakages.

- This is only applicable for Malaysia & Brunei. Device purchased outside of the Malaysia and Brunei are not eligible.
- Any purchase of ASUS Consumer Notebook & Gaming Series launched from Jan/2019.
- Perfect Warranty only applies to ASUS original hardware built into the ASUS Products, excluding any parts not installed by ASUS.
- Perfect Warranty does NOT apply to the following: scratches into the ASUS Products, excluding any parts not installed by ASUS, non-ASUS parts replaced by ASUS Service Center, any cables or accessories, and damages caused by acts of God, war.

ASUS INTERNATIONAL WARRANTY

ASUS guarantees no repair and component charges within the international warranty period for notebooks. The ASUS international warranty makes sure that you are protected even if you are stationed abroad, with our service centers established across 56 regions.

Perfect Warranty Service

- ASUS cover 80% of total repair & labour cost on 1st year of manufacturer warranty for consumer & gaming laptops.  
  Now you can enjoy greater peace of mind and worry no more!

ASUS reserve the right to amend perfect warranty details without prior notice.
EXTEND your standard warranty with ASUS Premium Care and keep your ASUS products in tip-top condition with an extra year of protection!

PROTECT YOUR PRODUCTS
ASUS Premium Care has several levels of cover to suit your needs, so you can create a tailor-made package to fully protect your ASUS products. ASUS Premium Care includes a wide range of benefits, including:

- **Expend warranty period**
- **Expert Support**
- **Hassle-free repair including parts and labor**
- **International or local repair and support**

ROG INTELLIGENT COOLING MEANS MORE FPS

ROG uses a strategic mix of hardware and features to achieve ideal cooling for each combination of components and chassis, combined with smart software that optimizes your experience for work and play. Our intelligent cooling strategies enable ROG Boost, which takes graphics to the next level by pushing GPUs to their maximum clock speeds, wattages, and beyond. Faster frequencies mean more frames per second and smoother, more engaging gameplay.

Windows 10
