

SMALL & MEDIUM BUSINESS SOLUTION GUIDE

March - May 2021

BUSINESS
Small Office 

TRENDS AND CHALLENGES

Technology is rapidly changing the way business users work in the 21st century. Small and medium-sized businesses (SMBs) have a strong need for innovative solutions to adapt to change and compete. Below are just a few of the challenges and opportunities facing SMBs, with many more besides. The good news is that ASUS is here to help companies deal with testing times and harness emerging trends. Ultimately, our solutions are designed to boost productivity, improve customer satisfaction, and drive your profits — so read on to find out what you need to know and how ASUS can help.

Digital transformation

Cloud-based devices and services are increasingly becoming the norm, so to survive and thrive, businesses need to embrace new concepts and technologies — not to mention those that have yet to be invented. A report by Progress, the global leader in application development, revealed that 47% of firms have yet to begin a digital transformation. An alarming 59% of those surveyed fear that it might even be too late to do so¹.

Remote working

A survey by cloud IT application provider Intermedia has revealed that driven by needs imposed by the COVID-19 pandemic, 57% of SMB business owners are likely to keep home working as a long-term option for employees. This number shows a significant shift both in how businesses are operating now and also how they expect to do so going forward².

Mobile device management

With increasingly distributed workforces reliant on ever-more-mobile devices, organizations of all sizes must embrace mobility. However, these new freedoms bring with them new dangers, so companies must prepare for them. IT infrastructure, supports, and security measures need to be carefully considered, and employee productivity and well-being managed. Enterprise mobility solutions can help SMBs negotiate these fresh challenges.

The employee experience

Numerous studies have concluded that happy employees make for increased customer satisfaction and business performance. Specifically, research by Forrester shows that content employees lead to better work performance, higher discretionary effort, and lower employee turnover — all of which contribute to an improved customer experience. Improving employee experience means providing mobile technology and multiple devices, making it easier to handle diverse workloads in any setting.

Data protection

Cyberattacks are on the up. A report by the Ponemon Institute, a research organization, commissioned by Keeper Security, laid bare that 66% of SMBs globally had suffered a cyberattack during 2018. The consequences of this can be devastating to a business, with data leaks and downtime leading to both reputational damage and, potentially, heavy-financial penalties. Many SMBs are unaware of the risks, let alone the potential fall-out, posed by cyberattacks³.

Flexible workplace

As the business world adapts to new realities, so too must workplaces. Forward-thinking SMBs are creating flexible offices and spaces where teams can meet in small numbers, comfortably and safely. The annual Global Workspace Survey from IWG reveals 65% of people believe that environments tailored to their particular functions result in greater productivity⁴.

1. Progress, "A Report on the State of Digital Business", May, 2016.

2. Intermedia, "Article : New study finds more than half of U.S. SMB owners believe working remotely is here to stay post-pandemic", May, 2020.

3. Ponemon, "2018 State of Cybersecurity in Small & Medium Size Business", November, 2018.

4. IWG, "Global Workspace Survey" 2020.

WHY ASUS?

ASUS is dedicated to solving the unique challenges facing today's small and medium businesses. We want to help SMBs unlock innovation for customer and employee-centric experiences, as well as broadly upskill talent with a comprehensive product portfolio that includes laptops, desktops, AiO PCs, Chromebooks, and software to rebound from the pandemic and prepare for the future.

Reliability & durability

Tough enough to last

Business users demand higher quality and greater reliability to withstand business rigors, so ASUS business PCs adhere to stringent MIL-STD 810 military-grade standards for durability. They feature reinforced structural construction and are built around ASUS motherboards — the world's No.1 brand — for an assurance of 24/7 stability and consistent performance.

Innovation

Do business in a new way

ASUS strives to create new business technologies, rather than merely making old things go faster. For example, our flagship ExpertBook B9 is the world's lightest 14-inch business laptop, at under 1 kg, and features the exclusive ASUS NumberPad 2.0 dual-function touchpad for easy data entry, and the ASUS AdaptiveLock sensor for fast automatic user detection and Windows Hello login. Our All-in-One (AiO) PCs, meanwhile, offer triple storage options to deliver superfast operation and large capacity — all in a slim, compact, and stylish chassis.

Flexibility

Ready to accommodate diverse working scenarios

With the increased use of video conferencing driven by remote working, we've implemented ASUS AI noise-canceling audio technology across our business offerings to ensure clear communications that are free from interference. We also offer a wide range of desktop PC form factors to fit any workspace, from traditional tower systems to compact small-form-factor (SFF) chassis to fit the smallest of spaces — positioned vertically or horizontally.

Security & IT management

Simplify your business processes

An IT infrastructure for your business can be built seamlessly and effortlessly with ASUS Control Center, our centralized IT management suite. It enables the easy remote control of hundreds of endpoint devices and multiple layers of security — using the Trusted Platform Module and Intel vPro® Platform. We also offer devices with physical webcam shields and biometric technology for login, including both fingerprint and facial recognition, making it easy to manage business assets at minimal cost with maximum safety.

Premium support & service

Maximum support, minimum downtime

ASUS Premium Care services go beyond the standard warranty to assure maximum protection with minimal effort. ASUS Premium Care includes a wide range of benefits, including an extended warranty period, Accidental Damage Protection (ADP), and Defective HDD Retention (DHR). The MyASUS software service helps you to quickly contact ASUS after-sales customer service online for support, providing diagnostic help and effective solutions, including operation from the Windows Recovery Environment (WinRE).

User experience

Go the extra mile with premium designs

With increasing reliance on mobile devices, business owners and employees are using their devices for longer periods — so alleviating fatigue is more important than ever. ASUS business devices employ a variety of technologies to protect individual wellbeing and maintain productivity, including TÜV-certified eye care, the exclusive ASUS ErgoLift hinge for a comfortable typing position, and support for Microsoft, Amazon and Google voice assistants to help users smartly manage their jobs. As well, our ExpertBook laptops offer elegant, precision-crafted chassis and Harman Kardon-certified speakers — smoothing the transition between work and rest.

BENEFITS FOR ALL

Sales executives

Those in sales must travel widely to visit clients and need reliable devices that provide fast operation and data retrieval. ASUS ExpertBook is a range of thin, light laptops that offer over 10 hours of battery life, with dual storage for superfast data transfers and large storage capacity, all protected by military-grade toughness and enterprise-grade security — ready for the rigors of the road and malicious hack attacks.

Engineers and data analysts

Faced with data collection, calculation, coding, and analysis, engineers need powerful devices with large storage capacity. ASUS ExpertCenter desktop computers are equipped with the latest high-performance components and up to four storage devices, with support for both RAID 0 and RAID 1 technology for faster operation and data protection. They also offer support for diverse display technologies, fast data transfers, and a comprehensive selection of I/O ports to support a broad variety of peripherals.

Finance and legal specialists

Data security is the key to those working in finance or legal departments. ASUS offers a variety of data protection solutions, including TPM chips, Intel vPro® Platform, and Chrome Enterprise Security. ASUS Control Center, our centralized IT console, also allows remote control of USB use and SSD data protection — so finance and legal staff can be reassured that their data is kept safe and secure.

C-level executives

Business leaders travel regularly, between rooms, buildings, and countries — and they need to work even while on the move. As well, video conferencing, remote data access, and managing tight and varied schedules are daily occurrences for C-level execs. That's why ASUS provides a suite of features that are just perfect for business chiefs, including AI noise-canceling audio technology, AI voice assistants, and ASUS WiFi Master Premium to empower them to take charge of every task.

Marketers and product managers

Teamwork boosts creativity and productivity. To support collaborative working, we offer lightweight laptops with a 180° display hinge — so it's easy for all to see. We've also created AI noise-canceling audio technology to provide crystal-clear communications for all, anywhere, with Harman Kardon-certified audio. We even offer a physical webcam shield for instant privacy.

Designers and illustrators

To cope with graphics-intensive applications, ASUS provides powerful laptops, desktops, and AiO PCs featuring professional-grade graphics with Independent Software Vendor (ISV) certification. Our PANTONE® Validated displays feature a wide color gamut and exceptional color accuracy. ASUS PCs are all built around ASUS motherboards for 24/7 stability, and with optimum cooling to ensure efficient and reliable rendering.

IT administrators

ASUS solutions help IT administrators improve efficiency and minimize downtime, so work can continue uninterrupted. The intuitive features in ASUS software help IT administrators ensure efficient management of a large number of devices, from required system updates to remotely-controlled troubleshooting. On the hardware front, ASUS design smarts such as tool-free cases and uniform screw size ease both routine maintenance and on-site repairs.

Back-office staff

ASUS also offers budget-friendly options with a wide range of specifications and form factors to meet the diverse demands of the many different workplace functions. Reliable components and solid construction ensure extended asset lifecycles to minimize the total cost of ownership (TCO) to your business.

NYK-TDG MARITIME ACADEMY

Each year, NYK-TDG Maritime Academy procures units that they send with the students abroad, for use in their Internship in NYK Line's World-class Marine vessels and facilities all over the globe. When they knew that ASUS has launched its Commercial line of notebooks, and included its offering of official 2 Years Global Warranty in the Philippines, they greatly considered the P2420LJ notebook due to its performance and reliability, plus the available Warranty options. The quality that ASUS Notebooks have established made the P2420LJ their eventual choice among their picks.

IT Challenge

The NYK-TDG Maritime Academy aims to produce world-class seafarers capable of working efficiently in a mixed-nationality and rigorous Maritime Industry environments. As such, they send their Senior students abroad for a year for their Internship/Exposure, for them to be trained to work in an organized, fast-paced environment, where precision and keenness are required.

To make sure the students are well-equipped, along with them, NTMA sends laptops that can keep up with their students by being fast-booting and powerful enough to run Marine Deck Simulator applications, do simultaneous multi-tasking, and more often than not, keep up with the students as they do heavy workloads on a portable notebook.

The Solutions

NTMA considered the ASUSPRO P2420LJ Notebooks for various causes. NTMA IT Department requires notebooks with a minimum specification of Intel Core i5 processors and at least 4GB of RAM, since they have to install NYK Shipboard Training and Assessment Recording System (NYK-STARs) in the PCs before sending them to deployment with the students.

Thanks to its slim design and sturdy one-piece build, spacious and tactile keyboard and multi-touch gesture touchpad, powerful processors and graphics options, and RAM options up to 16GB in capacity, students have the freedom to work anywhere, even in demanding working conditions.

The Results

NYK-TDG Maritime Academy eventually chose the P2420LJ as the students' deployed units due to the balance of productivity and mobility. The slim, one-piece build, and the robust hardware and software sets and configurations, plus the professional look, keeps up with the students as they face the professional world of Maritime Industry thru their Internship. The upgraded global warranty of their units to three years, which includes two years warranty for the battery, also grants added peace of mind to their IT department and the students as they have the units deployed abroad.

SUCCESS STORIES

Sto. Domingo National Trade School

As ASUS believes in the potential of the younger generation, the company is in full support to provide technological solutions by donating fifty (50) pre-owned ASUS laptops to Sto. Domingo National Trade School. The units will be installed in the school's main computer laboratory and will be used by its current students, faculty members, and the future enrollees of the school. Now, the students will enjoy 1:1 ratio (1 laptop unit per 1 student) – where they can individually maximize the use of laptop in their learning process and become computer literates in the near future.

DPWH Naga

"With the aid of ASUS computer we were able to achieve our goals in providing fast and efficient reports and services to our clients. We have procured and by far we haven't encounter any difficulties."

"What ASUS did was to fabricate things according to our needs, and so we were able to realize our goals. Now that the ASUS laptops/desktops have affect our workflow, it promotes competency to our community and makes us more capable of doing the job at the right time of course the result as an efficient employee."

Sunlink Technologies Inc.

In search of an equipment to bundle with their software, Sunlink Technologies, Inc. previously used the ASUS E161 for a time in their different branches nationwide.

With the wide choices available in today's market, the company upgraded to the ASUS AIO V161, a reliable and space-saving all-in-one computer that helps various businesses to maximize productivity by providing better customer experience.

Arcanum Construction Inc.

This year, ASUS Philippines partners with Arcanum Construction Inc. For 2 years, the construction business specializes in interior and fit outs for commercial areas and residential alike. This year, the business restructured Arcanum into three branches - the Construction group, the Furniture group and lastly, the Design Studio.

NYK-TDG Maritime Academy

NYK-TDG Maritime Academy chose the P2420LJ as the students' deployed units due to the balance of productivity and mobility. The slim, one-piece build, and the robust hardware and software sets and configurations, plus the professional look, keeps up with the students as they face the professional world of Maritime Industry thru their Internship.

ASUS AiO 24 (M241)

- Windows 10 / Windows 10 Pro - ASUS recommends Windows 10 Pro
- AMD Ryzen™ 5 3500U up to AMD Ryzen™ 7 3700U
- Shared Graphics
- Dual Storage Drive: 128GB up to 512GB M.2 NVMe™ PCIe® 3.0 SSD / 1TB HDD
- 23.8-inch FHD (1920x1080) 16:9 Anti-Glare, IPS-level Panel, Screen-to-body ratio of 88% with Touch Screen Option
- 4GB up to 16GB DDR4 SO-DIMM
- SonicMaster ultimate audio experience with huge stereo sound with two 3W Stereo Speakers
- 2 years global warranty

ASUS AiO 22 (V222)

- Intel® Core™ i3-10110U up to i7-10510U Processor
- Windows 10 / Windows 10 Pro - ASUS recommends Windows 10 Pro
- Integrated Intel® UHD Graphics with optional NVIDIA® GeForce® MX110 2GB VRAM
- Dual Storage Drive: 128GB up to 512 M.2 NVMe™ PCIe® 3.0 SSD / 1TB HDD
- 21.5-inch LED Backlit Full HD (1920x1080) Non-Touch Anti-Glare Panel with Slim Bezel up to 87% Screen-to-body ratio
- 4GB up to 16GB DDR4 SO-DIMM
- SonicMaster-Ultimate audio experience with huge stereo sound with two 3W Stereo Speakers
- 2 years global warranty

ASUS AiO (V161)

- Intel® Celeron® Processor N4000
- Windows 10 / Windows 10 Pro - ASUS recommends Windows 10 Pro
- 128GB to 256GB SATA SSD / 500GB up to 1TB SATA HDD
- 15.6-inch HD (1366 x 768) 10-point Multitouch Display
- Up to 8GB DDR4 2400MHz RAM
- 2x 1.5W Speakers
- 4x USB 3.1 Gen 1, 1x 6-in-1 Card Reader, 1x HDMI-out
- Integrated 802.11a/b/g/n/ac (2x2)
- Flexible using scenario with Optional Wall Mount
- 2 years global warranty

1. Touchscreen display feature is available in select AiO models.

BUSINESS-CLASS MANAGEABILITY

ASUS Expert Series simplifies asset-management processes for MIS staff, as well as for end users.

ASUS Control Center

Comprehensive centralized IT management

ASUS Control Center is a centralized IT management suite designed to enhance productivity and security by offering a comprehensive set of controls via a user-friendly interface.

Hardware & Software Monitoring
System administrators can easily monitor hardware status, software utilization, services, and inventory.

Task Scheduler
Once the Task Scheduler is set up, it automatically runs routine tasks such as turning devices on and off and dispatching software.

Enhanced Security
ASUS Control Center supports Windows Active Directory authentication, registry editor, and USB storage disabling.

Advanced Search and Grouping
The unique Metadata Management lets you tag devices with custom information.

Efficient Energy Control
Integrate ASUS ASMB & Intel Data Center Manager (Intel DCM) technology to provide real-time power consumption data.

Intuitive User Interface
The HTML5 web-based console provides an intuitive dashboard, enabling you to manage your IT environment from different device types anytime and anywhere.

ASUS Business Manager

Simple PC management

ASUS Business Manager is a PC-based platform that consists of hardware, software, and firmware to provide unique security and productivity capabilities.

System Backtrack
Establishes a checkpoint to restore the system to its optimal status.

My Logo
Allows businesses to customize an exclusive boot-time logo

Device lock
Device lock controls read/write access to USB storage devices, card readers, and optical drives.

File Shredder
For complete and secure file deletion. The settings pass US Army AR380-95, DoD 5220.22-M, and DoD 5220.22 M(E) standards.

Secure Drive
Allows the creation of an encrypted virtual partition in your local drive (such as the C: drive) where you can save your important data.

System restriction
The system restriction setting allows an administrator to control access to data, system registry editing, and system settings.

MyASUS

One-stop portal of ASUS-developed software tools and services

MyASUS is an exclusive app that helps you easily communicate with customer service, monitor repair status, and access product instruction manuals, among other capabilities.

Customer Service
Provides aftersales service including instant support via ASUS Online Chat, repair status tracking, and a simple click to purchase ASUS Premium Care.

System Diagnosis
Identify any problems that are encountered, report the sources of the issues, and provides instant suggestions.

ASUS AppDeals
Enjoy discounts on premium apps and ASUS-exclusive deals via AppDeals.

Link to MyASUS
Integrates your ASUS PC with your mobile devices, boosting your productivity and allowing easier multitasking.

Hardware settings
Personalize your way of using your PC including colors, charging settings, keyboard usage habits, or optimize your PC performance by changing the fan mode and network settings.

ENTERPRISE GRADE SECURITY

Modern IT threats can strike businesses from any place and all angles. Security needs to cover every entry point with multiple layers of protection, so ASUS Expert Series products provide total security using multiple hardware and software layers, ranging from physical hardware protection to identity security to protect your data from unauthorized access. ASUS also offers a series of asset-management solutions for IT managers.

IT Management

It allows the Management Information System (MIS) staff to remotely control and manage company assets, making sure all digital data are safe and sound

Intel vPro Platform

The Intel vPro platform support hardware-based data encryption at the file, folder, and drive levels. Accelerate encryption and protect keys directly within the hardware.

ASUS Control Center

A centralized IT management software that supports Windows® ActiveDirectory authentication, registry editor, and USB storage disabling, to ensure that all data and information is controlled and secured.

AI Security

MIS can enable/disable external USB devices or optical drives writing or reading data to restrict user's access right to get confidential data or reduce virus infection.

Identity Security

Identity security protection helps prevent attacks by hackers looking to capture passwords and encryption keys for sensitive data

Biometric Security

The built-in IR camera and fingerprint sensor let you use Windows Hello technology to quickly and securely log in.

BIOS / HDD Password

The HDD password protects all data stored on the hard disk, keeping the data safe from being read or overwritten by unauthorized users.

Trusted Platform Module (TPM2.0)

A TPM chip securely stores the authentication information (such as passwords or encryption keys) used by software to protect important data and transactions.

Hardware Protection

Hardware-based protection ensures robust physical security for your PCs and notebooks

Kensington Security Slot & Padlock

The Kensington type locks are useful to prevent quick grab-and-run thefts of equipment from casually supervised locations.

Chassis Intrusion Alert

The chassis intrusion alert would show on BIOS during the next boot once your PC case had been opened.

ASUS PREMIUM CARE SERVICES

Maximum support, minimal effort

ASUS Premium Care services go beyond standard warranty to assure maximum protection with minimal effort. It's the peace of mind you need to get things done without compromising productivity or mobility.

MINIMIZED
DOWNTIME

INCREASED
EFFICIENCY

REDUCED
COSTS

Comprehensive Support

Nobody knows your devices better than our own ASUS hardware experts. That is why they are only a phone call away to help you get the best out of your devices and assist you when you need support from troubleshooting, diagnostics, and more.

Warranty Extensions

Keep that peace of mind feeling for up to 5 years¹ with an ASUS extended warranty². Ideal if you are planning to deploy your products for a longer period.

Next Business Day (NBD) Repair

Minimize disruptions by investing in NBD service. Eliminate the hassle of supported hardware drop-offs and pick-ups.

Laptop Accidental Damage Protection (ADP)

ADP gives you the assurance that should your laptop be subject to accidental damages from events such as liquid spills, electrical surges, drops, and falls, you will be covered with no excess to pay.

Keep My Drive

In the unlikely event that the original storage drive requires replacement, Keep My Drive allows you to retain the defective drive and receive a replacement, installed by an authorized ASUS technician.

Battery Warranty Extension Package

Extend the warranty of your battery to match the warranty of the laptop with Battery Back-Up. You will be entitled to one battery replacement during the warranty period as a result of any manufacturing defects.

1. Service and warranty coverage may vary depending on country and territory and may change without notice. Please check with your supplier for exact offers.

2. Must be purchased and activated within 90 days of your ASUS product purchase date.

ASUS BUSINESS ECOSYSTEM PARTNER

Pave the way for business with ASUS Ecosystem Partner

Microsoft

ASUS and Microsoft share the goal of empowering every professional to reach his or her potential. With Windows Autopilot, IT admins can quickly transform a new device into one that's business-ready, reset existing devices to remove apps, change settings, or even access personal files — and they can do all of this remotely. Microsoft Teams provides a convenient online conferencing so professionals can find new ways to continue collaborations wherever they are.

Google

ASUS and Google are working together to make collaborating easier. G Suite brings together all the favorite productivity apps of professionals, including Google Docs™, Google Slides™ and Hangouts™, to keep everyone connected and productive. ASUS Chrome Enterprise devices are secured by design, and they are built to prevent and defend against cyberattacks. In addition, the automatic updates and multi-layered security offered by Chrome OS keeps data safe.

Intel

Equipped with powerful Intel® processors and Wi-Fi-enhancing technology, ASUS devices offer the very best in performance, efficiency, and connectivity. ASUS devices powered by Intel provide performance and reliability to empower professionals with unparalleled tools and deliver seamless working experiences. The Intel vPro platform sits atop Intel's commercial product offerings. It is designed with IT in mind to help businesses, large and small, keep employees productive, secure company assets, and simplify fleet management.

AMD

Powered by AMD processors, ASUS Business devices deliver optimized performance to meet the needs of diverse industries alike, empowering professionals to reach their full potential.

Endless OS

The goal of Endless OS is to enable people to harness the power of computing, anywhere. ASUS and Endless OS combine hardware and software to make it easy and free to access valuable preloaded resources for business users.
