countries covered by the international warranty

ASUS is the No.1 consumer laptop brand in Asia-Pacific, and a top-three vendor of consumer laptops globally. We're also proud to be world's best-selling, most award-winning motherboard brand. The combined talent of 14,500 international employees, including a world-class R&D team of 5,000 engineers, has elevated ASUS to become one of Fortune magazine's World's Most Admired Companies in 2021.

Incredible Stories

Outperforming Competitors through 600 Days in Outer Space

R&K, a major supplier of computers and electronic equipment for aeronautical missions to outer space, provided MIR Space Station astronauts with two ASUS notebooks for their 600-day stint in space. "The ASUS notebooks never overheated like some of the devices made by other companies," said Russian cosmonaut Sergei Avdeev.

First to Reach the Tallest Peak in Antarctica

On December 16, 2003, acclaimed mountaineers Shi Wang and Jian Liu embarked on an expedition to the summit of Mount Vinson — the tallest peak in Antarctica, where temperatures are known to drop below minus 100° F. The device they chose to take with them was an ASUS S200N notebook.

First to Reach the Top of Mount Everest

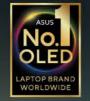

For a Mount Everest expedition, a mountaineering team selected a series of ASUS notebooks as their devices of choice. Expedition team leader, Captain Wang Yongfong, took an ASUS notebook with him to the peak: At 8,848 meters above sea level, the ASUS notebook became the first in the world to reach the top of Mount Everest.

Laptop

The ScreenPad is a visually stunning element that, when paired with the 4K OLED display above, makes for a captivating scene. Second displays on laptops aren't a new concept: Asus had quite a library of dual screens in the early 2000s. However, it's currently the only company that does the conceit justice.

UX581 | 2019

If you're looking for one laptop to rule them all or one that stands out from the rest in a big way, the Zenbook Pro Duo might just be what you're looking for.

TECH CRITTER

UX581 | 2019

It brings a whole new user experience to the table where traditionally we are required to have an external display attached to the laptop. Now, everything is packed nicely in the chassis of a laptop that weighs just under 2.5 kg.

UX581 | 2019

Zenbook Pro Duo was super fluid, responsive, and a sheer joy to use. No stutter or lag whatsoever when manipulating high-res images, running intensive apps, or multiple

The biggest difference of course are the size of their displays but all of them have thinner bezels than ever before that Asus has dubbed as 'NanoEdge' panels which maximize screen size,

GAMERBRAVES

UX581 | 2019

Opening the lid, the first thing you'll notice will most likely be the secondary touchscreen. Your creativity and productivity can be pushed to the next level with this ultimate efficiency.

It is an innovative laptop. If you want to have a ultra compact laptop with latest technology and unique features, then Zenbook 14 UX434F is one of the best

Our goals for a sustainable future

We strive to make a positive impact on the planet through all that we do. See our goals below for 2025 and beyond.

- 100% renewable energy in Taiwan-based operations centers by 2030; and in global operations centers by 2035
- Key products 30% better than Energy Star efficiency standards every year
- · 30% reduction in key suppliers' carbon intensity

- 100% increase in sustainable value creation by intensifying digital transformation & innovation efforts
- · Strengthen industry/academia cooperative projects to train 1,000+ students

Responsible Manufacturing

- Implement labor rights management, with 100% of key suppliers completing Responsible Business Alliance (RBA)
- 100% responsible mineral sourcing of tantalum, tin, tungsten, gold, and cobalt from qualified smelters
- Strengthen information security across the supply chain by ensuring that 100% of key suppliers are in compliance

Circular Economy

- · Promote sustainable procurement and increase the use of environmentally friendly materials in products and packaging by 100%
- Boost green competitiveness & increase proportion of Eco Labels in revenue to over 50%
- Enhance R&D environment safety & attain 100% coverage of international information security standards
- Achieve a global recycling rate of 20% for ASUS products

The actions we take for the products you have

1,500

Over 1,500 tons of post-consumer recycled (PCR) plastics used in our products since 2017

20,000

recycled paper used in our products in 2022

40,000

Recycling service covers 75% of the world with over 40,000 tons of e-waste recycled since 2019

Over 20,000 computers donated to 1,800+ non-profit organizations since 2008

Made for the Earth. Made for you.

ASUS is committed to driving progress toward a more sustainable future. Our laptops incorporate sustainable materials in the product and its packaging. Top ecolabels and compliance, including EPEAT¹, ENERGY STAR®, and RoHS, prove our commitment to protecting the earth and giving you the best.

30% Post-Consumer Recycled (PCR) Plastics

Designed with the Earth in mind by using 30% PCR plastics, all without compromising quality, function, and durability.

100% Recyclable Packaging

Recyclable packaging reduces the need for single-use paper, achieving the goal of reduce, reuse, and recycle.

30% More Efficient than ENERGY STAR®

The energy efficiency of ASUS laptops in 2022 exceeded ENERGY STAR® standards by 30% on average2, greatly reducing its carbon footprint.

^{1.} EPEAT registered where applicable. EPEAT registration varies by country. See www.epeat.net for registration status by country.

^{2.} Percentage varies according to device configuration

MILITARY-GRADE

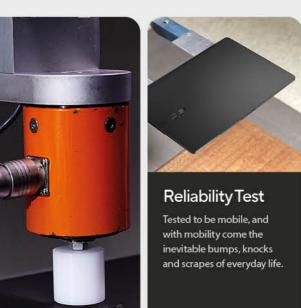

World's most Strictly Tested US Military-grade Laptop Durability¹

From 2023 onwards, ASUS consumer laptops² will be strictly tested according to the latest, most-demanding MIL-STD 810H US military-grade standard with 12 test methods and 26 procedures to ensure maximum reliability and durability. ASUS consumer laptops undergo the world's most extensive and strictest US military-grade testing, so you can be assured that your ASUS consumer laptop is durable and reliable. These factors also inherently benefit longevity and thus sustainability.

Beyond military grade, ASUS quality test

Your laptop should never let you down — period. That's why ASUS consumer laptops undergo the most rigorous torture-test regime, using up to 16 separate tests in environmental conditions we hope you'll never encounter. So whether you're an urban explorer or an Arctic trailblazer, you can rest assured your laptop is ready for the worst that life on the road can throw at it.

Extreme Environmental Test

Tested to be mobile, and with mobility come the inevitable bumps, knocks and scrapes of everyday life

Noise & Audio Test

Extensive noise testing to minimize the noise from fans and other components.

A barrage of durability tests designed to push ASUS laptops to their physical limits.

ESD Test

Electrostatics Discharge (ESD) Test ensures that the laptops have strong electrostatic protection.

EMITest

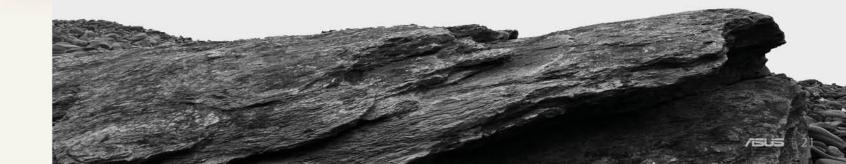

Electrostatics Discharge (ESD) Test ensures that the laptops have strong electrostatic protection.

WiFi Connection Test

An exclusive technology that optimizes WiFi range and performance in almost any environment.

- 1. Selected products are tested using enhanced military-grade MIL-STD-810H durability standards, with 12 test methods and 26 test procedures, to ensure extra toughness. Based on ASUS internal market research using available information and testing reports from main laptop brand websites on Oct 28, 2022, ASUS consur laptops use a regime consisting of 26 test procedures, which is the consumer laptop industry's strictest and most extensive test regime for the MIL-STD-810H standard.
- 2. The testing regime includes the requirements of both military-grade standards and ASUS quality tests, and varies depending on device. MIL-STD-810 testing is conducted on selected ASUS products only. Note that the MIL-STD-810 testing helps to ensure the quality of ASUS products but does not indicate a particular fitness for military use. The test is performed under laboratory conditions. Any damage caused by attempts to replicate these test conditions would be considered accidental, and would not be covered by the standard ASUS warranty. Additional coverage is available with ASUS Premium Care.

Testing for the best laptop quality

In our full test suite of 12 test methods and 26 test procedures, including operation in harsh environmental conditions including extremes of altitude, temperature and humidity — along with physical vibration and shock tests designed to mimic rough day-to-day handling.

ASUS Lumina OLED

Experience Visuals Like Never Before

At ASUS, we are constantly striving to innovate and optimize your experience with our OLED displays. As a result, we are proud to announce ASUS Lumina OLED — the name for a new generation of laptop displays with unprecedented visual quality. ASUS Lumina OLED displays are more accurate, more adaptive, and more reliable than other OLED displays, making them the ultimate choice for professionals, gamers, and entertainment enthusiasts who demand the best. These vivid OLED displays feature Pantone® Validated color rendering, VESA DisplayHDR™ True Black certification, and exceptional Delta E < 1 color accuracy, making them perfect for any task. When you choose a laptop equipped with an ASUS Lumina OLED display, you will enjoy the best possible visual experience, along with adaptive services such as color customization, power saving, and sharpened video playback. ASUS Lumina OLED displays are designed to be reliable, with eye care certification and ASUS OLED Care burn-in prevention, and laptops with ASUS Lumina OLED displays are strictly tested for durability. Get ready to experience a whole new level of visual performance and quality with ASUS Lumina OLED displays.

5 reasons to choose an OLED display

100% DCI-P3 best-in-class color gamut

Vivid displays for precise creativity, color work and vibrant, visual entertainment.

70% less harmful blue light

With lower harmful blue-light levels, OLED offers better eve care and sleep quality

120Hz / 0.2ms ultimate motion clarity

Blur-free action scenes in movies and games, with ultra-smooth text scrolling.

Clearer images at any brightness

Rich colors are maintained even at low brightness levels 1,000,000:1 high contrast ratio

The deep blacks allow you to see previously unseen details in dark movie scenes

Experience perfection with an ASUS Lumina OLED display

More Accurate

Color Accuracy **Motion Clarity** Perceptual Brightness Contrast Ratio

ASUS Lumina OLED displays deliver industry-standrd Pantone® Validated color rendering, with VESA DisplayHDR™ True Black certification and a Delta-E <1 color accuracy. This means that ASUS Lumina OLED displays have a high dynamic range, deep blacks, and are capable of showing a wide range of colors with exceptional detail, even in dark scenes.

More Adaptive

ASUS Splendid OLED Power Saving ASUS Tru2Life

ASUS Lumina OLED displays are visually stunning, and also offer adaptive services. These include ASUS Splendid for color customization, Target Mode for power saving, and ASUS Tru2Life for sharpening video playback. These services enhance your visual experience and give you more customization options.

More Reliable

Eye Care ASUS OLED Care **Panel Protection**

ASUS Lumina OLED displays are designed to be reliable, with TÜV Rheinland low blue-light certification for eye protection and ASUS OLED Care for burn-in prevention, along with a special thermal design and US military-grade testing for durability. ASUS also offers a free screen exchange service if burn-in issues occur during the warranty period.

1 Ultimate professional-grade colors

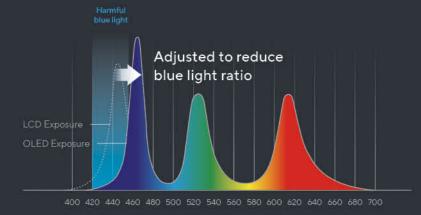

ASUS PANTONE® Validated OLED laptops deliver exceptionally detailed and realistic visuals, with a cinema-grade 100% DCI-P3 color gamut. This means that the colors reproduced on the display are richer and more vivid: it's ideal for color-intensive projects, but also enhances any kind of content.

2 70% Less harmful blue light for eye comfort

Blue light is known to cause visual discomfort and disrupt sleep quality. However, due to the nature of the special organic lighting materials in an OLED display, ASUS OLED laptops emit 70% less harmful blue light, and they're also certified by TÜV Rheinland and SGS. More importantly, unlike traditional blue-light filters, shifting the spectrum means there's no need to compromise color accuracy.

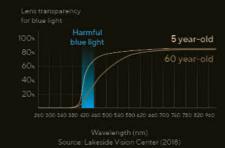

70 % reduced blue light

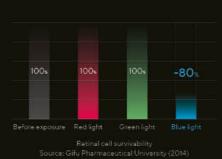

Premature aging of retina

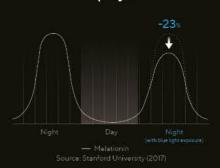

Research has shown that in a five-year-old child's eyes, approximately 60% of the received blue-light emissions pass through to the retina, compared to only around 20% for a 60-year-old adult. With ASUS OLED displays, the significantly lower blue light levels mean better eye care for children.

Harmful effects on retina cells

Cone cells are the cells in the eye's retina that enable color vision. In experiments conducted by the Gifu Pharmaceutical University in Japan, mice cone cells were subjected to red, green, and blue light sources. The survivability of the cone cells under blue light exposure dropped dramatically to 20% after 24 hours, while cone cells exposed to other colors retained around 100% survivability.

Blue light disrupts sleep cycles

When it gets dark, your brain produces the hormone melatonin, which helps to maintain the correct scheduling of your daily sleep cycles. According to a Stanford University study the production of melatonin can be blocked by exposure to blue light at night, and potentially cause sleep disruption.

3 Extreme Contrast, Astonishing Detail

ASUS OLED laptops reproduce blacks perfectly. An OLED pixel consists of three sub-pixels, each with its own selfgenerated illumination: a Full HD (1920x1080) display has 2,073,600 pixels, which means it has 6,220,800 self-illuminated sub-pixels, compared to just a few dozen LED backlights in a Full HD LCD display. When displaying black on an OLED display, the pixel is simply turned off to produce the darkest possible black. This enables extremely crisp and clear images even in the darkest scenes. You'll be surprised to see how many new details you'll spot in your favorite movies!

Gaming

Ultimate 120Hz / 0.2ms for exceptional motion clarity

The new premium ASUS OLED display with 120Hz refresh rate and 0.2ms pixel response time is incredibly smooth and clear. In fact, both surprisingly and counter-intuitively, the 120Hz / 0.2ms OLED display is faster than a 165Hz / 3ms LCD IPS display — because it reduces ghosting to an indiscernible level. Simply put, this means even fast-moving visuals are smoother and clearer than ever.

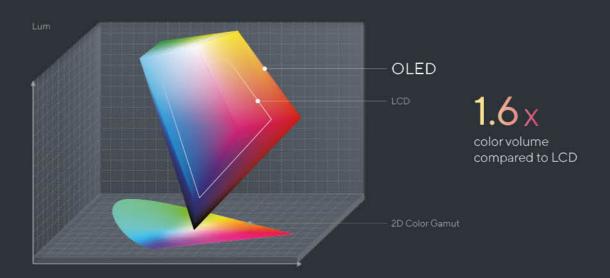

144Hz / 12.5ms LCD

165Hz / 3ms LCD

120Hz / 0.2ms OLCD

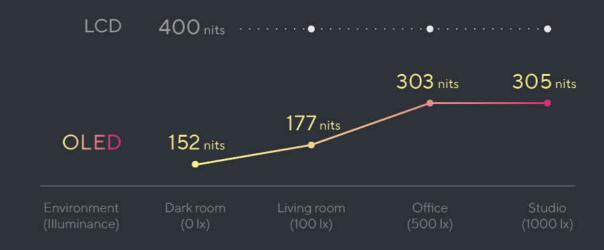

5 OLED has 1.6x color volume compared to LCD

On conventional LCD displays, detail and color quality usually decrease dramatically as the brightness is reduced. But ASUS OLED laptops are able to show great detail at lower brightness settings due to their high contrast and their ability to maintain a wide color gamut at low brightness. When calculating the 3D color volume — which adds illumination to the traditional 2D color gamut — ASUS OLED displays have about a 60% higher color volume, offering better color performance at any brightness level.

OLED has much higher perceptual brightness

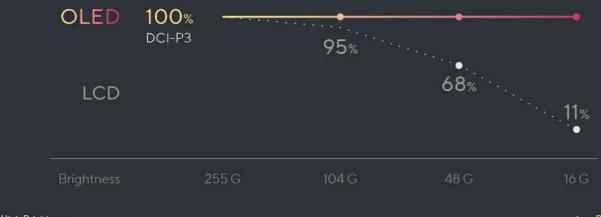

ASUS OLED laptops can maintain good color reproduction at any brightness level, so you can freely adjust the screen's brightness to suit your working environment, while still enjoying exceptionally vivid colors. For example, in the living room environment (usually illuminated at about 100 lux), you only need 177 nits brightness in an OLED display to produce the same clear image as 400 nits brightness in an LCD display. At the lower brightness levels needed on OLED displays, there's less harmful blue light emitted.

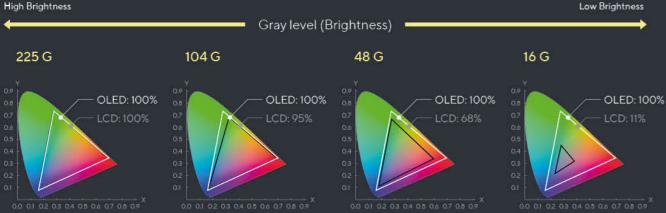

28 | **/ISUS**

Color-perfect at any brightness

ASUS OLED laptops maintain a 100% DCI-P3 color gamut at both high and low brightness levels, while on a standard LCD laptop the color gamut is reduced dramatically at low brightness levels. At a gray-level brightness of 16 G, LCD laptops only have an 11% DCI-P3 color gamut, while ASUS OLED laptops maintain a 100% DCI-P3 color gamut.

High coverage of HDR standard

The industry HDR standard covers a huge range of brightness from 0.0005 nits — the lowest measurable level — up to 10,000 nits. The true blacks and high brightness possible with OLED displays give them a 75% coverage of the HDR standard, compared to about 46% for LCD displays.

Exclusive Visual Fine-tune

ASUS Splendid Technology

ASUS Splendid technology enhances the display by reproducing more-brilliant colors for visually stunning experience, whatever you're looking at! And you don't even have to lift a finger, as it works by automatically fine-tuning the display settings — including color temperature, contrast and brightness — to optimize any kind of image. The result is richer, deeper colors and stunning visuals whether you're watching movies, playing games or browsing through your photos.

Normal Mode

Default Normal Mode gives you see through ASUS's panel appears to be as close as how you see the same thing with your own real eyes.

Eye Care Mode

ASUS Eye Care mode could reduce the emissions of blue light by up to 30% so that your eyes are always protected when Eye Care mode is used.

Vivid Mode

In Vivid mode, we make carefully calculated adjustments to the color saturation of the images to make them look more vivid and vibrant.

Manual Mode

In Manual mode, you can easily adjust the color temperature to your taste, within a range of -50 to +50, using a simple slider control.

Customizable color gamut for every need

On selected models, the display's color gamut can be quickly and easily switched for different tasks or preferences. On top of the ultravivid native color setting, choose sRGB for creating web content or browsing, DCI-P3 for cinema content, or Display P3 for movie-grade colors finessed to fit everyday viewing in the real world.

sRGB

Web content-creation standard.

DCI-P3

Cinema color standard.

Display-P3

Movie-grade colors adjusted to fit everyday viewing.

Unprecedented Productivity

Best budget laptops with pro-grade processor

Ever felt like your laptop just isn't quite fast enough to keep up with your workflow? ASUS now offers a wide range of laptops with pro-grade H-Series high performance CPUs, designed to double your productivity in a thin and light chassis. The latest Intel H-Series CPU makes all your tasks easier, whether they're office or personal, presentations or play. Powered by up to a 12th Gen Intel Core i7-12700H CPU with high speed RAM, alongside the ASUS IceCool cooling system, there's always plenty of power in reserve when the going gets tough.

The lineup ensures users have all the features they need to get it all done: long battery, blazing fast internet and connectivity speeds, as well as incredible performance, all in a good budget. Comparing to previous generation ASUS laptops, the new series is capable of being boosted up to a TDP (Thermal Design Power) of 45 watts, it's the fastest performing generation to date!

Core[™] i9-13900H 13th Gen Intel® CPU

IceBlades

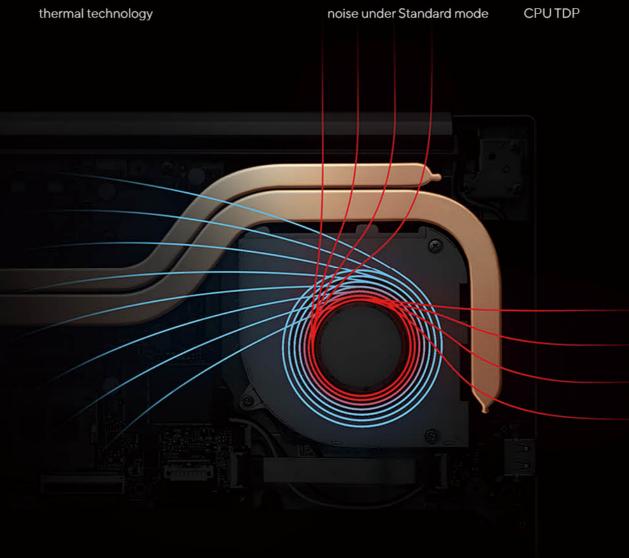

Up to heat pipes

ASUS IceCool

<38 dBA

45 W

Up to

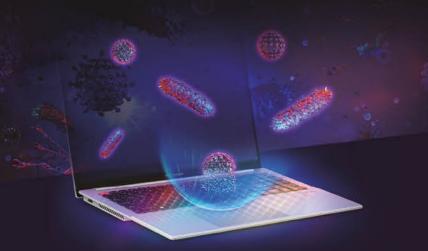

To keep it cool in all situations, ASUS IceCool thermal technology ensures that the laptops would not overheat and affect performance. For example, ASUS Vivobook S 14X OLED uses upgraded 8 mm and 6 mm heat pipes, and an IceBlade fan that efficiently accelerates heat transfer. The 97-blade fan and impeller are made of a liquid-crystal polymer that means they're lighter and thinner than ordinary fans. In addition, the IceBlade fan also use a fluiddynamics bearing that's quieter and has less vibration than an ordinary bearing. The end result is that the mighty CPU can run comfortably at a blistering 45 watts total TDP in Performance mode — with no throttling!

Personal care

ASUS Antimicrobial Guard Plus: Inhibit 99% of COVID-19, flu virus and bacteria.

ASUS Antimicrobial Guard Plus is applied to frequently touched areas of your laptop to help keep it hygienic. This technology uses a denser treatment* that inhibits viruses and bacteria, while ASUS Antimicrobial Guard uses a regular treatment that inhibits bacteria only. And it is scientifically shown — using the ISO 21702¹ and 22196² standards — to inhibit virus and bacteria growth by more than 99% over a 24-hour period³. Strains used for the tests include the SARS-CoV-2 (COVID-19), H3N2 (Influenza A) and the E. coli bacterium⁴.

* ISO 21702 tests for SARS-CoV-2 Variants (Omicron, BA.5), H3N2, H1N1 and ISO 22196 tests for Staphylococcus and E.coli

Why ASUS Antimicrobial Guard Plus?

We constantly use our laptops to type up reports, send out emails, move laptops around, or eat over them when curled up on the couch while streaming movies. Food crumbs, pet hair, cigarette ash, and even oil from our skin can all be found on and inside our keyboards.

Working with pets

Discussion on the same laptop

Surfing via computers

Eating while using laptop

What types of viruses & bacteria does this tech inhibit?

Viruses and bacteria are everywhere in our daily life. Antimicrobial Guard Plus inhibits all viruses and bacteria with an envelope (the outermost layer of many types of viruses and bacteria) from the surface of the protected parts. ISO 21702 testing shows that it can inhibit the growth of SARS-CoV-2 (COVID-19), H1N1, H3N2 (Influenza A) and harmful bacteria.

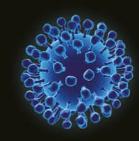

SARS-CoV-2 virus (COVID-19)

Since 2020, COVID-19 has ravaged the globe. More than 580M people worldwide have been infected.

Since the 2009 H1N1 pandemic, the (H1N1) pdm09 flu virus has circulated seasonally in the US, causing significant illnesses, hospitalizations, and deaths¹¹.

Influenza A (H3N2)

The influenza A and B viruses that routinely spread in people are responsible for seasonal flu epidemics each year¹⁰.

Staphylococcus

Staphylococcus aureus is a type of germ that about 30% of people carry in their noses. Most of the time, it does not cause any harm; however, sometimes it causes infections¹².

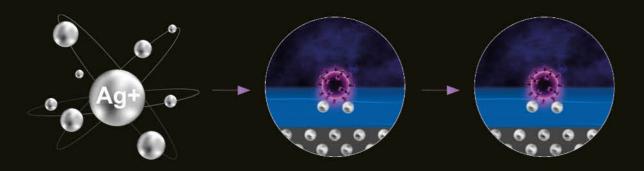

E. coli

Escherichia coli is a bacterium found in the environment and on foods. Although most strains of E. coli are harmless, others can make you sick¹³

34 | **/15U5** | 35

How does ASUS Antimicrobial Guard Plus works?

Silver ions³ prevent reproduction.

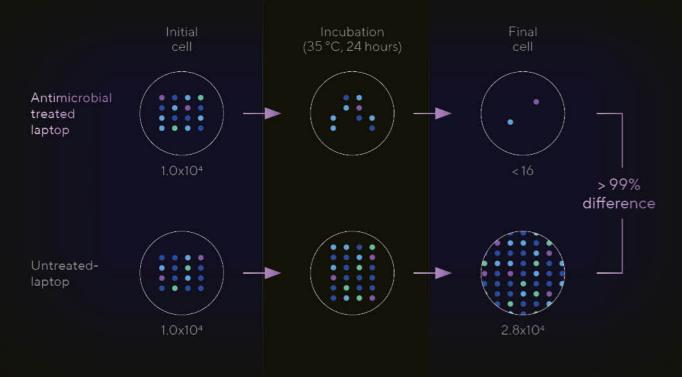

ASUS Antimicrobial Guard Plus is a surface coating 14 on the laptop that contains positively-charged silver ions.

Silver ions and negatively-charged microbial cells are attracted to each other.

Silver ions pierce the surface to damage their structure, inhibiting reproduction.

ISO 21702-tested & ISO 22196-tested: Proven 99% viral & bacterial-inhibiting effect

Without ASUS Antimicrobial Guard Plus, an estimated sample of 10,000 (pfu/ml) cells grew to 28,000 (pfu/ml). Performing the same test with Antimicrobial Guard Plus saw the count reduced to just 16 (pfu/ml) — a growth restriction of more than 99%. Our testing conforms to the ISO 21702 and ISO 22196 international standards.

Protection for all main touchpoints

A silver-ion or similar hygienic coating is applied to the most frequently touched areas of the laptop 15, including the keyboard, the touchpad (or ASUS NumberPad), the palm rest area and power button/fingerprint sensor. This ensures your laptop stays clean and sanitary, reducing the spread of potentially harmful virus and bacteria via contact.

> At least 3 years of bacterial inhibition

- .04. COVID-19, H3N2, H1N1, E. coli and Staphylococcus tests were performed by independent third-party laboratories: Boken Quality Evaluation Institute, Japan Textile Products Quality and Technology Center, and National Defense Medical Center.

- 08. Note that the protective effects of ASUS Antimicrobial Guard were tested by ASUS on April 26, 2021, and follow the ISO 22196 method on our specially-treated test samples. The tests provide a simulation of three years of wear and tear, and include exposure to salt spray, thermal shocks, and both alcohol and wool-felt tests. Actual effective antibacterial-protection period may vary

- 14. The actual composition of ASUS Antimicrobial Guard Plus may vary.

 15. To identify which specific areas on your model are protected by ASUS Antimicrobial Guard Plus, please refer to the relevant product website for more info

Ergonomic design

Nuanced ASUS ErgoSense keyboard and touchpad

It's our mission at ASUS to elevate human interaction with technology to a higher and more intuitive level than ever before. The latest ASUS ErgoSense keyboard and touchpad are engineered to enable an unrivaled input experience that's in harmony with how you move, feel and touch. Your comfort is our highest priority. That's why the ErgoSense keyboard has an incredibly satisfying feel, with the optimum bounce and travel calculated with fine-tuned precision. Scrolling on our ErgoSense touchpad is just like touching silk. Its surface has a special low-friction coating that's also fingerprint resistant, keeping your work area as clean as new. Experience the ErgoSense keyboard and touchpad, and you'll soon find yourself cruising effortlessly through your work.

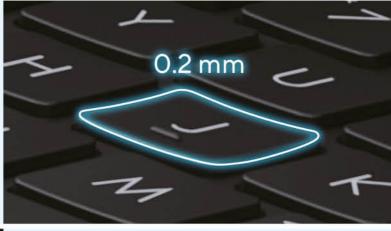

Full-sized standard desktop pitch keyboard

It's time to say hello to ErgoSense, and goodbye to cramped laptop keyboards! The full-size 19.05mm key pitch is the same as a desktop keyboard, so you can whizz through your work with superb typing comfort and accuracy.

The 0.2 mm key-cap dish is designed to match the shape of your fingertips. The smooth-edged indent is carefully crafted for a comfortable yet precise feel, so your fingers are gently guided to the ideal contact point with the keys.

Long key travel 1.4 mm

Good tactile feedback is important to let you know that your key press has been registered. The long 1.4 mm key travel lets you type without having to use too much force. And underneath the key, there's a rubber dome crafted by keyboard experts here at ASUS. It guarantees your click force is met with just the right tactile bump you need for a nice grip.

Ultra-smooth touchpad

The hydrophobic coating applied to our touchpad has a high water-contact angle. This means the nanotech-like surface provides smoother feedback for every scrolling movement. It's like touching silk!

Anti-fingerprint touchpad

We apply a high-end PVD anti-fingerprint coating that ensures excellent resistance to wear and tear. This coating also makes the surface really easy to clean. And even after more than 10,000 slides, the touchpad will still be as smooth as new.

Smart Conferencing

ASUS AiSense camera effects, always look great in video calls

For your best video call experience, ASUS AiSense camera makes sure that you always look your best during virtual conferences.

Background Blur

Blurs the background to protect your privacy while doing video conference call at home.

Motion Tracking

Automatically detects and follows your motion for a better webcam experience while you are moving around.

Lighting Correction

Detects the lighting conditions and dynamically adjusts the webcam settings for the best result.

Appearance Filter

Brings out your best looks, just like applying natural makeup for your conference calls.

Gaze Correction

Automatically detects your eye movements and adjusts your gaze so you appear to be looking directly at the camera.

ASUS 3DNR

ASUS 3D Noise Reduction (3DNR) Technology significantly upgrades the webcam image clarity for clearer conference calls.

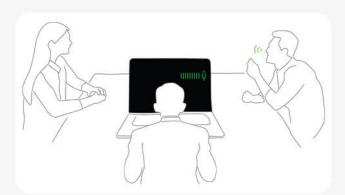

Next-level AI noise-canceling audio technology

To provide exceptional remote-working and video-conferencing experiences, features ASUS AI Noise-Canceling Technology that employs machine learning in order to isolate unwanted noise from human speech. This technology helps to filter out ambient noise for optimum group conference-call quality. The ASUS AI Noise-Canceling Microphone feature in the MyASUS app can filter out ambient noise — so you'll hear what everyone else is saying.

Conference calls with more possibilities

Conference calls can be single-presenter or multi-presenter, gathered around a single laptop with voices coming from various directions. With the upgraded system enabled via the MyASUS app, it detects and optimizes audio from either one direction or from all directions — ensuring top conference call audio quality.

Single presenter conference call

Single-presenter conference call mode can filter out noise and other voices, and ensures only the voice in front of laptop can be heard. When you switch on the Target Speaker Tracking mode it can even target and track new talkers within a 180° arc, making the feature ideal for recording large groups as well as for individuals.

Multi-presenter conference call

Multi-presenter conference call mode filters out ambient noise whilst identifying multiple voices from all directions and distances, so all voices can be heard more clearly.

Intelligent Camera and Sensor

Unlock, instantly

The FHD infrared(IR) camera allows you to unlock your laptop quickly and securely. It also powers an adaptive dimming feature that darkens your screen when you look away!

Perfect brightness and color tone, anywhere

Whether you're in bright sunshine or a dim room, auto-brightness works behind the scenes to show your images at their best — providing more comfort for your eyes and maximizing battery life. There's also a color sensor that detects ambient light levels and automatically adjusts the brightness and color temperature* of the screen to provide the best-looking image for your surroundings.

Break The Sound Barrier

Dolby Atmos: Dive into sound

With Dolby Atmos, sound can be more spatially dynamic — even overhead — creating an immersive soundscape that feels more realistic.

Dirac: A new perspective on laptop audio

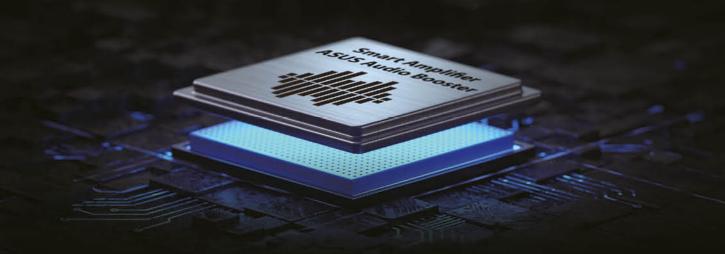

Dirac technology allows your device to reproduce the most immersive, pristine, and harmonically balanced experience you've ever heard on a PC, laptop or tablet. You'll hear a soundscape that is wider, with more depth than you would have thought possible. It's time to unleash the true audio potential of your device.

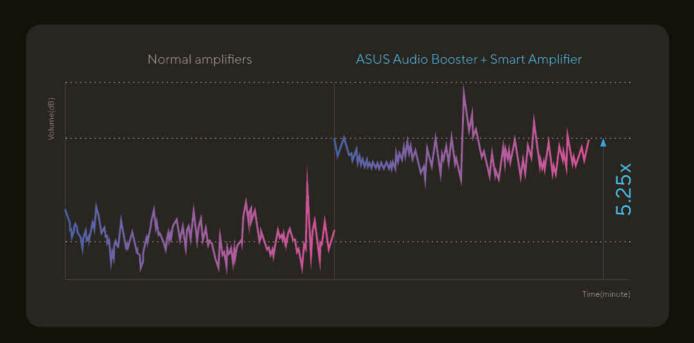

Louder sounds and dynamic sound experience!

Using a Smart Amplifier and ASUS Audio Booster technology, the audio volume is boosted by up to 5.25x. The distortion-suppressing dual-channel Smart Amplifier is equipped with a powerful DSP chip that can prevent long-term damage to the sensitive speaker voice coils. Creating or listening to audio in your videos, movies, music or games has never sounded better!

Maximum possible volume

Combining Smart Amplifier and ASUS Audio Booster technology, the audio volume is boosted by up to 5.25x for a powerful audio experience.

44 /SUS

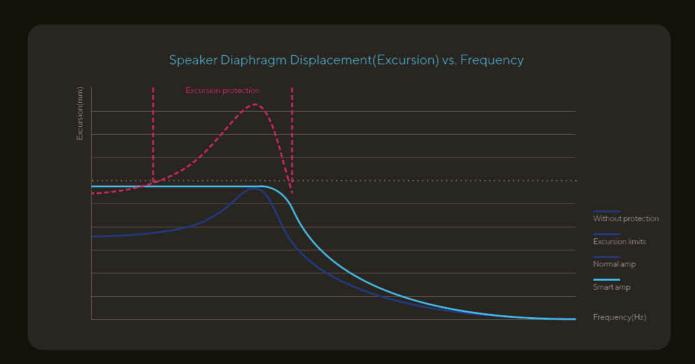

More clarity

The Smart Amplifier helps to deliver clearer audio by boosting volume across the entire audio spectrum, not just at certain frequencies.

More clarity

The Smart Amplifier helps to deliver clearer audio by boosting volume across the entire audio spectrum, not just at certain frequencies.

Unrivaled Mobility

ASUS WiFi Master

ASUS offers a comprehensive range of wireless connectivity solutions. The WiFi 6 in the laptops allows you to load online content in the blink of an eye, and it's made even better by the ASUS-exclusive WiFi Master Technology, which includes ASUS WiFi RangeBoost, WiFi Stabilizer, WiFi SmartConnect, and TaskFirst.

WiFi RangeBoost utilizes multi-antenna technology to expand your WiFi connectivity as well as WiFi speed. For rock-solid stability in your WiFi connections, WiFi Stabilizer filters out wireless interference, so you'll always enjoy the fastest possible speeds. WiFi SmartConnect automatically selects the best WiFi source, so your laptop connects seamlessly to the best WiFi signal and known mobile hotspots. TaskFirst gives you control over which task you'd like to prioritize your network speed to – preventing others apps from competing network capacity with your focusing task.

USB-C Easy Charge (5V-20V)

USB-C Easy Charge support means that your laptop can be used with a wide range of standard USB-C chargers. You can enjoy ultrafast charging with any PD (Power Delivery) certified charger, including the supplied fast-charge adapter, or juice up your device on the go with airline chargers, portable chargers or power banks!6 It's incredibly convenient when there are no wall sockets available, such as on flights or in vehicles.

Seamless Multitasking Experience

ScreenPad

The new ScreenPad™ with ScreenXpert 2.0 upgrades the traditional laptop experience, adding an interactive secondary touchscreen that enhances your productivity with more possibilities. Its intuitive smartphone-like interface lets you easily manage tasks and create your own seamless multitasking workflow. There's a series of handy ASUS utility apps to boost productivity including Phone Call, Task Group, Handwriting, and so on. There are also useful quick controls that improve the interactions between the main display and ScreenPad: for example, you can now launch a video or chat box — or many other apps — onto ScreenPad to take advantage of the extra space wherever you are, and without interrupting your work on the main display.

ScreenXpert 3 on ASUS PCs

The ScreenXpert 3 — which you can download from Microsoft store or find in your PC's Start menu — helps you to manage app windows across displays connected to your ASUS PC*. It also lets you turn your camera or microphone on and off and check their status on your PC's screen without using the keyboard. ScreenXpert 3 for ASUS PCs puts you in full control of your workflow!

ScreenPad Plus Now with ScreenXpert 3

Designed to give you the ultimate edge in workflow efficiency, the unique full-width ASUS ScreenPad™ Plus secondary touchscreen works seamlessly with the main display. And with the new ScreenXpert 3, it's now even easier to multitask and organize work via intuitive controls that allow you to manage app windows across all your main display, ScreenPad Plus and external displays. You can now create a larger, more productive workspace whenever and however you want.

GlideX

GlideX is a cross-device screen-sharing solution. Using wired or wireless connections¹, you can create a bigger and better work or play space. GlideX optimizes your workflow in the blink of an eye!

Screen Extend

Turn your tablet into a secondary display for more screen space on the go, giving you dualdisplay convenience anywhere!

Screen Mirror

With Screen Mirror you can project your device's screen to a PC for easier keyboard input and more screen space. Use your Android or iOS apps via Windows in the productive space of your PC!

Link to MyASUS

The Link to MyASUS feature is a handy tool that's part of the MyASUS app². It seamlessly integrates your ASUS PC with your mobile devices, boosting your productivity and allowing easier multitasking. A series of features enables you to transfer files or links wirelessly between devices, or access local PC files remotely from your phone. Link to MyASUS simplifies your life!

File Transfer

Simply tap or drag to share files between ASUS PCs, or between your PC and mobile devices in the blink of an eye. You can now send a photo or video you've just captured from your phone to your PC and it's much quicker than using Bluetooth®!

URL Share

Simply tap the share icon in your browser and click MyASUS. The link to the webpage you're browsing on your PC will be instantly sent to your mobile device — where it will open automatically for seamless on-the-go convenience3.

Hands-Free Phone Call

Make and take phone calls, which can be routed through your PC's speakers and microphone. You can also access your phone's contact book on your PC, so you can search for contacts and call them directly. There's no need to dig out your phone from your bag or pocket!

Shared Cam

Shared Cam lets you use your phone's camera as your PC's webcam for video calls in real-time. Just select "Link to MyASUS - Shared Cam" as the video source in your PC video-conferencing app, and enjoy easy and seamless webcam sharing.

Remote Access

If you're working away from the office, you can easily access your work files remotely from your mobile device, anywhere, anytime, with no hassle. Use your mobile device to remotely access files stored on your ASUS PC, and use your PC as a personal cloud replacement and gain access anywhere and anytime!4

- * The Link to MyASUS mobile app is supported on mobile devices running Android 9.0 & iOS 13.0 or later.
- * URL Share requires the Microsoft Edge browse
- * The Remote Desktop is supported in Windows 10 or Windows 11 Pro with a local user account
- * Features may be varied by different models.

Customize your workflow

TaskFirst

When you have limited internet connection speed and needs to prioritize a certain task, such as gaming or downloading a file, TaskFirst allows you to choose and prioritize bandwidth for that task.

Tru2Life

Tru2Life is an exclusive video enhancement technology that's similar to that found in high-end TVs. It uses intelligent software algorithms to optimize the brightness and sharpness of every video frame, improving contrast by up to 200%. As a result, video imagery looks more colorful, more vivid and sharper with incredible contrast.

Fan Profile

Noise from computer CPU cooling fans can be annoying, especially in quiet places like the bedroom or the library. Fan profile gives you the flexibility to operate the fan at maximum speed when processing heavy tasks, and change to a lower fan speed when working in a quiet environment. You can also easily switch between the modes by pressing the Fn + F hotkey combination.

* Software included may vary by model.

MyASUS

ASUS AiSense Camera

To improve the quality of your online meetings, the ASUS AiSense camera includes a variety of useful effects, including Lighting Optimization, Background Blurring, Eye Tracking and Motion Tracking.

MyASUS provides easy access to ASUS apps* that are designed to help you maintain your system, update your

ASUS OLED Care

To maximize the lifespan of OLED displays, ASUS OLED Care includes a special screensaver that runs automatically after the laptop is idle for 30 minutes, significantly reducing the chances of OLED screen aging.

Target Mode

To save battery life and also maximize the OLED display lifespan, the entire screen is dimmed apart from the uppermost active window.

Splendid

ASUS Splendid ensures that all ASUS display panels show identical, accurate colors. By default, ASUS Splendid panels are set up to show the most accurate colors possible for the best viewing experience. But we realize that sometimes you might want to make adjustments to color. For this reason, we've included three additional modes beyond Normal mode: Vivid, Eye Care, and Manual.

ASUS Intelligent Performance Technology

If your PC supports ASUS Intelligent
Performance Technology, you can switch
between different modes to intelligently
increase CPU performance with improved
stability, while allowing all-day battery life
and a quieter and cooler laptop. You can also
easily switch between the modes by pressing
the Fn + F hotkey combination.

WiFi SmartConnect

When moving between different rooms with your laptop, the WiFi signal can become unstable. With WiFi SmartConnect, your laptop automatically connects to the router with the best signal in your current environment. It also memorizes the mobile hotspots you connect to and prioritizes connections to them when they're detected.

Automatic Keyboard Backligh

The Ambient Light Sensor (ALS) automatically brightens or dims the keyboard backlight according to the ambient lighting conditions.

Auto-brighten

The keyboard backlight is turned on when the ambient lighting changes from bright to dark.

Auto-dim

The keyboard backlight is turned off when the ambient lighting changes from dark to bright.

Battery Health Charging

Overcharging a laptop battery may degrade the battery, resulting in a shorter lifespan. It can also cause swelling due to oxidation. In Battery Health Charging, you can choose to limit charges to 60%, 80% or 100% to prolong battery lifespan and reduce the chance of damage from swelling.

ASUS AI Noise-Canceling Technology

ASUS Al-Noise Canceling Technology includes an Al Noise-Canceling Mic and Al Noise-Canceling Speaker. The Al Noise-Canceling Mic suppresses ambient noise around you – Single-presenter conference call mode focuses the voice of the person in front of the PC; Multi-presenter mode makes sure that multiple voices from varying directions and distances can be heard clearly.

Harness your creative potential with the ProArt Creator Hub app. The app provides a unified experience across all your connected ProArt or ASUS creator devices1 so you can easily calibrate colors, adjust settings, monitor performance, and optimize your workflows. There's also a new Color Control that helps you optimize color tools: we've collaborated with Pantone® to provide digital color data that will help you express your wild creativity.

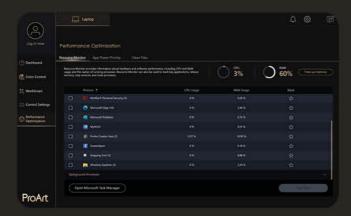

Dashboard

A quick glance at the dashboard gives you an overviewof all your connected devices. Keep track of system parameters, including processor load, memory usage,or fan status. With heat dissipation so crucial to unleashing your creator PC's full performance, ProArt Creator Hub includes four Fan Profile settings² that are tailored to suit different scenarios. Use Full Speed mode when rendering heavy graphics for extreme efficiency, or switch to Whisper mode for distraction-free silence.

Performance Optimization

Easily manage your PC's resources and boostperformance in an instant with ProArt Creator Hub's Performance Optimization features! These handy tools include Resource Monitor, App Power Priority, and Clean Files. Resource Monitor lets you manage all currently running processes on your device, while App Power Priority prioritizes power usage for your key applications. Clean Files helps you find and delete unwanted files on your PC for optimum performance.

Color Control³

Color Control is your central destination for all color-related features. It helps you explore more possibilities in your creativity, giving you access to the full spectrum of creative color solutions.

Color Management

With the new Color Management feature you can easily capture and analyze any color on your screen with Screen Color Picker, and immediately see all the color data for your reference with Color Analysis. It's really handy when creating, and you can use the Color Palette to build your personal color preferences and let your creativity flow. We've collaborated with Pantone® in 2023 to provide digital color data that will help you express your wild creativity.

Color Calibration

Accurately calibrate the color rendering of your ProArt device, with adjustable settings for brightness, color gamut, color accuracy, color temperature, and gamma.

54 /645

ASUS Dial & Control Panel

ASUS Dial4

Our creator-focused products, such as ProArt Studiobook, Zenbook Pro, Vivobook Pro, and ProArt devices are equipped with the groundbreaking ASUS Dial3. This is a precision-engineered rotary control that gives intuitive fingertip control over app parameters and values. You can customize your ASUS Dial in the Control Settings menu to work perfectly with Adobe® creative apps including Photoshop®, Lightroom® Classic, Premiere® Pro, After Effects® and Illustrator®. We've also added support for Microsoft Office apps, entertainment apps, browser apps and a wide range of other creative apps for a more intuitive and personalized experience!

ASUS Control Panel

ASUS Control Panel is an exciting virtual interface designed to give you precise and intuitive control over your creative apps when using creator-focused products. With the fully customizable dial, slider, button and scroll touch controls displayed on your secondary touchscreen, you can easily assign controls to change brush size, change saturation, resize the layout, change components, and much more. You can customize ASUS Control Panel to work with Adobe® creative apps — including Photoshop®, Lightroom® Classic, Premiere® Pro, After Effects®, Illustrator® — and a wide range of other creative apps to adapt the features and functions that match your needs and enhance your efficiency.

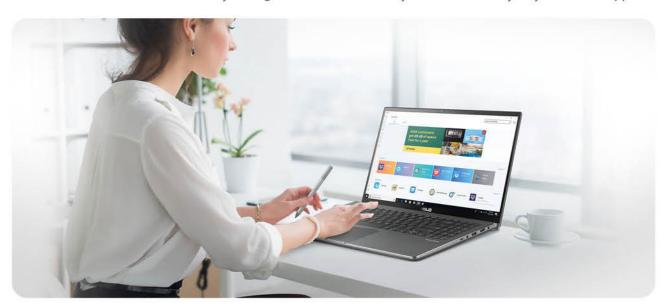

Worry-free Support

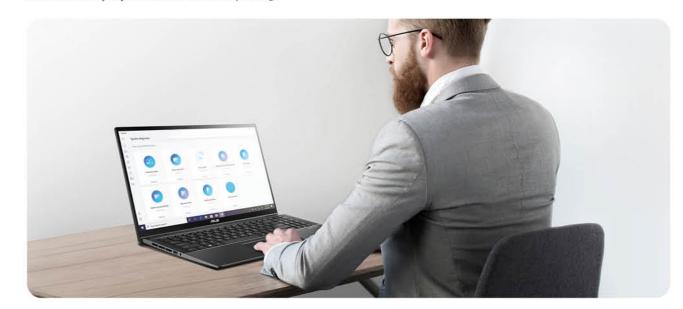

ASUS AppDeals

Once you're part of the ASUS family, you can enjoy discounts on premium apps and ASUS-exclusive deals via AppDeals. As part of a select few, you get to enjoy reduced prices for many of the most popular apps out there. Be sure to check in often! We're constantly adding new exclusive deals so you can save money on your favorite apps.

System Diagnosis

The System Diagnosis tool helps you identify any problems that are encountered, reports the sources of the issues, and provides instant suggestions. It also helps our customer service representatives to identify problems quickly and accurately if your device needs repairing.

ASUS LATEST PRODUCT REVIEW - UAE

August, 2022 #UX8402

With a next-gen ScreenPad Plus and an unrivalled design, this is the ultimate

Gulf News

#UX5304

The ASUS Zenbook S 13 OLED is a top choice for professionals on the go. With its slim and lightweight design, it offers exceptional portability without compromising on power.

Gulf Business

#UX9702

Whether for work or play, the Zenbook 14X OLED provides a compelling blend of portability, performance, and visual excellence

Khaleej Time

For working on the move, Asus Zenbook S 13 OLED stands out as a prime option. It not only features a ultra-thin and lightweight design but it also does it without sacrificing

Gulf News

This laptop should be a top choice for executives and creators as it outpaces its competitors on most 77

Gulf Business

The ASUS Zenbook Pro 14 Duo OLED is a great laptop for creators out there. It comes with a very useful second screen in the form of ScreenPad Plus along with its own ecosystem of apps. It also offers a stunning OLED display and very strong internals that can take up any creative job.

Arabianresell ?

#UX3404

When it comes to slim, powerful and lightweight laptops, it is hard to look beyond the Asus Zenbook 14X OLED. It provides performance enough for now and for the future

Gulf News

May, 2023 #UX5304

The lightweight champion is punching well above its weight, and even more. If you are in the market for a Windows-based laptop that can rival Apple's MacBook Air, the ASUS Zenbook S 13 OLED is an ideal choice.

THRILL YOUR SENSES

Power Play
