Avoid texts that aren't safe

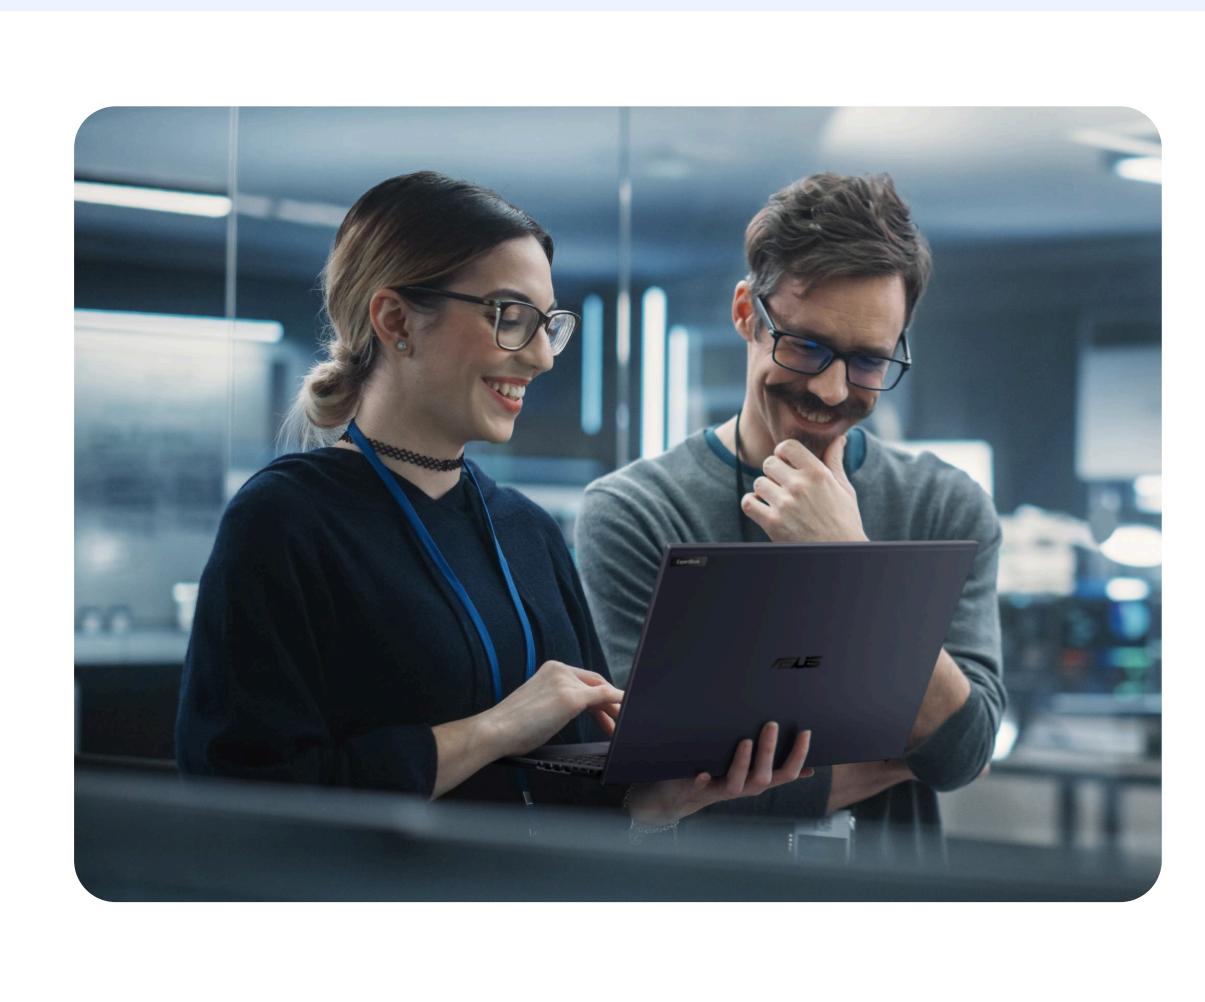

Steer clear of video scams

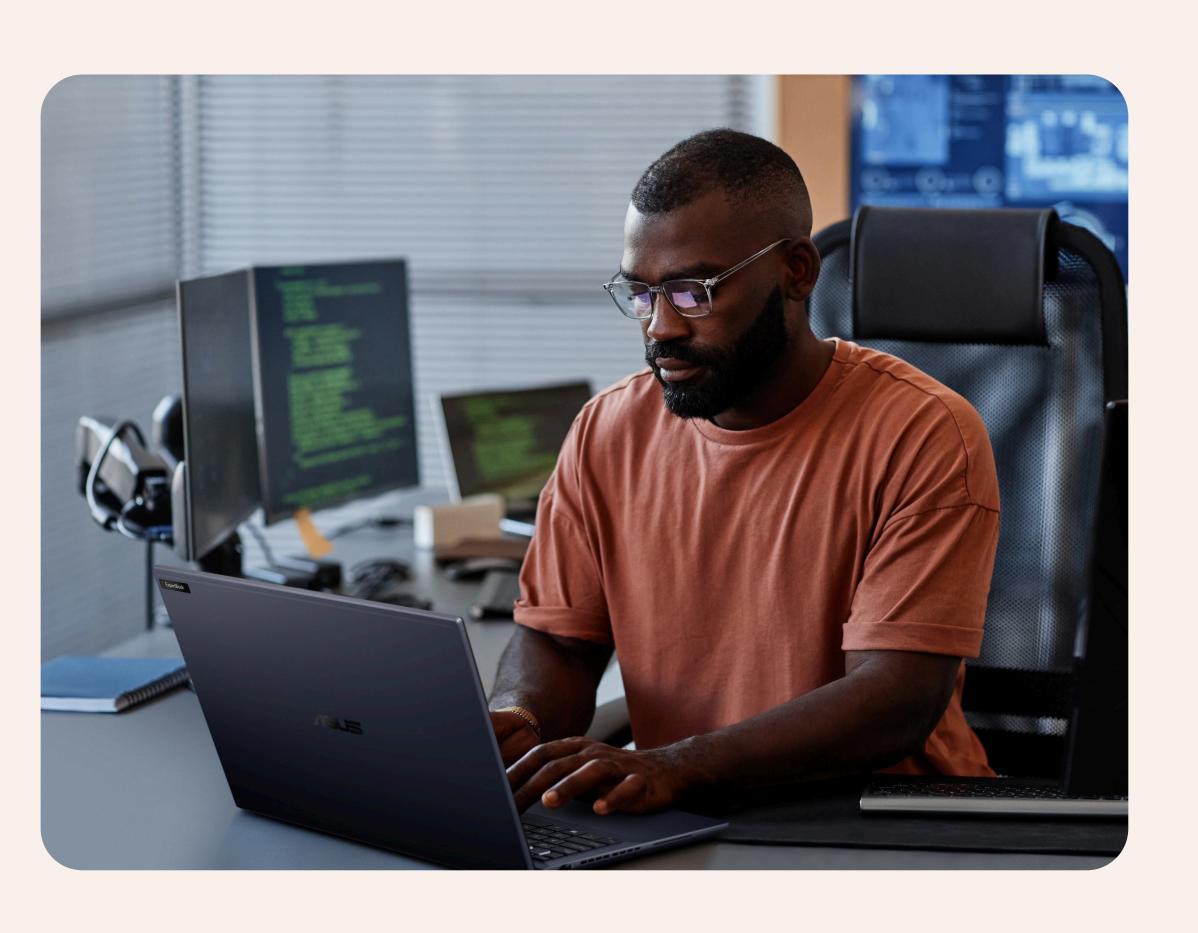

Scams, viruses, and online threats may be a shared challenge, but with McAfee+, they don't have to be our shared fate.

With McAfee, you're never alone in this fight. You're always one step ahead.

# Why is a cybersecurity solution important?

Whether shopping, learning, or streaming online, our privacy, security, and identity are exposed to threats. As technology weaves itself into our lives in new and unexpected ways, some of it will get quite personal and close to home.

### Can't I just get security free online?

- © Free online security is available; however, they're not all-in-one multi-level, integrated security like McAfee.
- Think of paid security as an investment in your protection. Many free products identify threats but do not automatically remove the danger as paid versions do.
- Also, some free programs share data with advertisers to provide a free service. Not only does this mean you'll be served ads, but your privacy is also at risk.

# Why does ASUS recommend McAfee?

McAfee has been recognized by industry leaders for over 35 years.

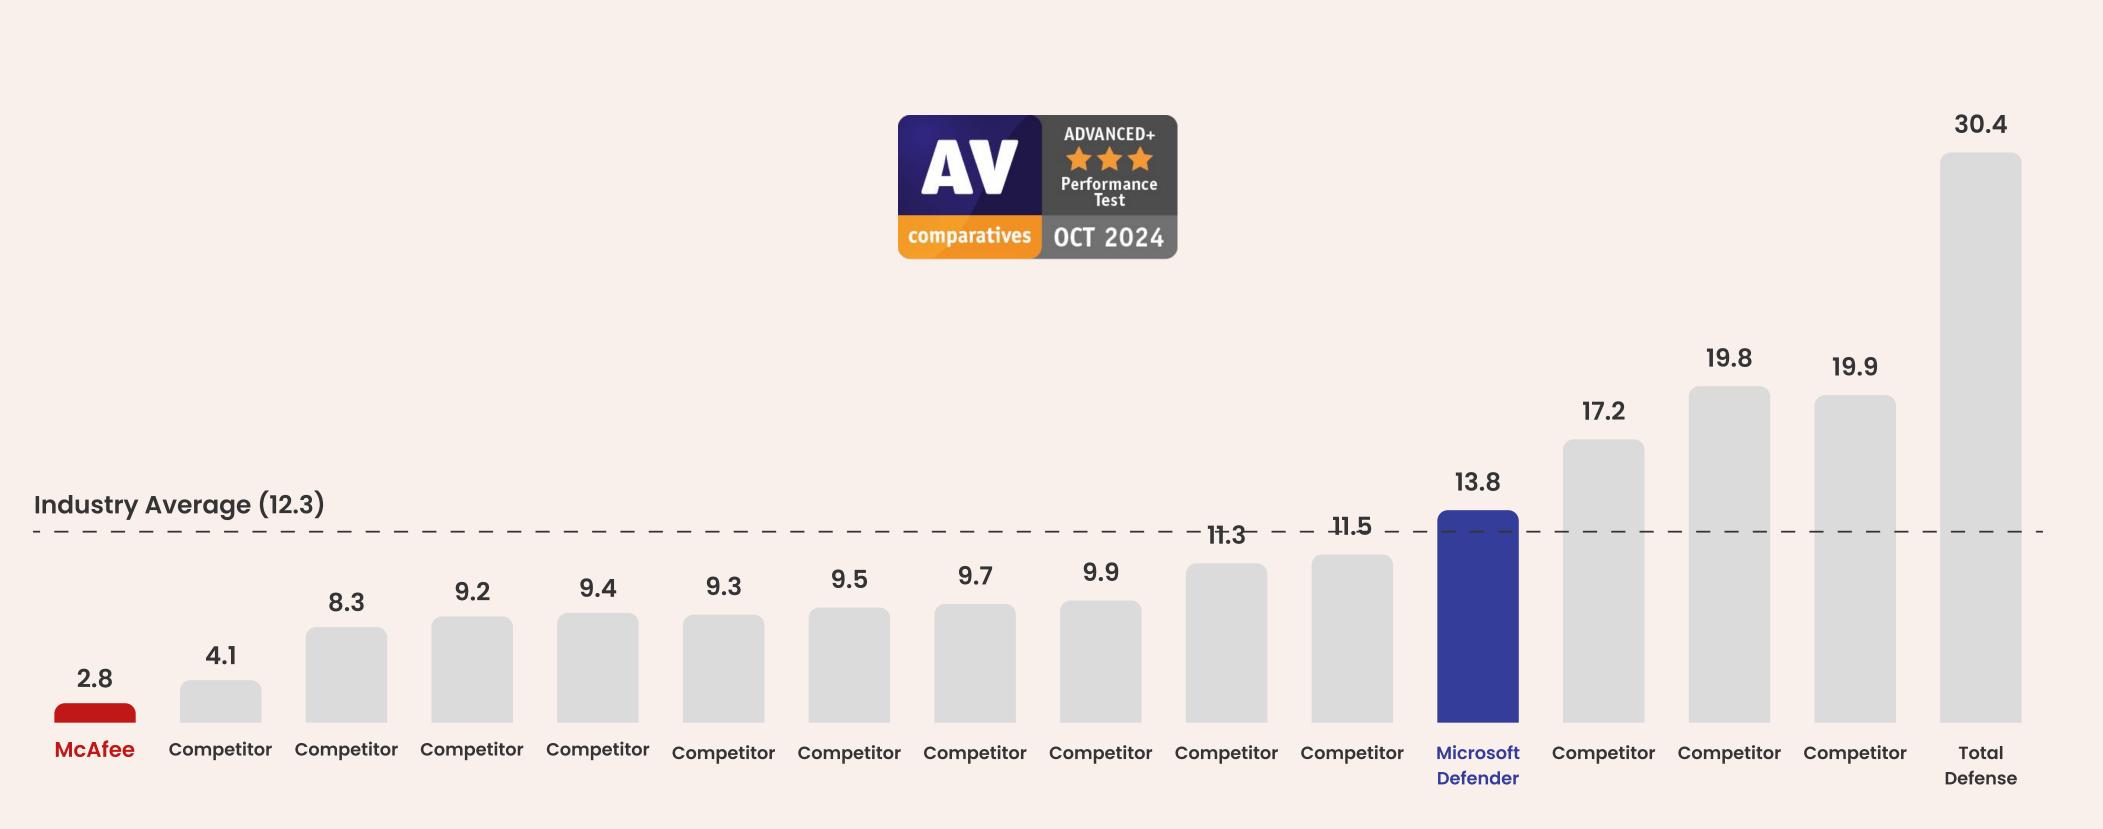

- Over the years, McAfee has significantly reduced the disk space required, the memory usage, and the processes running, dramatically reducing slowdowns and making systems run fast.
- McAfee+ Premium is more agile with faster scans, quick updates, and uses significantly les space on your PC for performance that won't slow you down.
- ② It is better to have peace of mind with security on your system than to be seriously slowed down by spyware and viruses that could be even more harmful.

# Beating out competitors like Microsoft Defender, McAfee earned our best-ever result in the latest AV-Comparatives PC Performance Test

With an overall impact score of only 2.8, McAfee+ Premium proved itself again to be the lightest product in the test, outperforming all other security vendors and performing well under the industry average (13.8). McAfee is therefore again awarded with the highest possible ranking: ADVANCED+ 3 Stars.

# McAfee comes preinstalled on most PCs as ASUS recommended protection

Register your subscription to unlock our comprehensive protection for all your devices, identity, privacy, and life online.
